PREFACE

Upper Canada Consultants has been retained by Metro-Mountainview Developments Inc. to prepare a Planning Justification Report in relation to applications for an Official Plan Amendment, Zoning By-law Amendment and Draft Plan of Subdivision at 575 Quaker Road in the City of Welland, within the Regional Municipality of Niagara. The subject lands are legally known as Part of Lot 235, Geographic Township of Thorold, now in the City of Welland, Regional Municipality of Niagara.

The submitted Official Plan and Zoning By-law Amendment applications have been prepared to facilitate the development of the subject lands for the proposed subdivision that includes a variety of residential built forms, a parkland block, a condominium block and a stormwater management facility block.

The proposed Official Plan Amendment seeks permit an additional use and increased density though maintain the "Low-Density Greenfield Residential" designation for the majority of the subject lands by making the lands a Special Policy Area. The Amendment also proposes to designate the condominium block as "Medium Density Residential – Special Policy Area" to permit increased density, uses and scale, and designate the Park Block and Stormwater Management Block as "Open Space & Recreation."

The proposed Zoning By-law Amendment seeks to amend the existing "Agricultural – A1" Zone to "Site-Specific Residential Low Density 2 – RL2-XX", "Site-Specific Residential Medium Density – RM-XX", and "Neighbourhood Open Space – O1" Zones.

The proposed Draft Plan of Subdivision will implement the lots and blocks within the boundary of the subject lands. Through the registration of the Subdivision, the road widening, parkland and stormwater management facility blocks will be dedicated to the municipality.

This Planning Justification Report provides an analysis of how the applications satisfy the requirements of the *Planning Act*, are consistent with the Provincial Planning Statement (2024), and conform to the 2022 Niagara Official Plan and the City of Welland Official Plan (as amended).

This Report should be read in conjunction with the following reports and materials:

- Draft Plan of Subdivision
- Draft Local Official Plan Amendment
- Draft Zoning By-law Amendment
- Stage 1 Archaeological Assessment
- Stage 1-2 Archaeological Assessment
- Stage 3 Archaeological Assessment

•	Environmental Impact Study including Terms of Reference and Headwater Drainage Feature Investigation Functional Servicing Report with Stormwater Management Plan

DESCRIPTION AND LOCATION OF THE SUBJECT LANDS

The submitted applications pertain to lands known municipally as 575 Quaker Road in the City of Welland, within the Regional Municipality of Niagara. The subject lands are legally known as Part of Lot 235, Geographic Township of Thorold, Now in the City of Welland, Regional Municipality of Niagara.

The subject lands are shown in Figure 1, below.

Figure 1 - Aerial View of Subject Lands (Cropped from Niagara Navigator)

Northwest Welland Secondary Plan Area (NWSP)

The Subject Lands are located within the Northwest Welland Secondary Plan Area; lands within this Area are generally described as the Northwest Welland Expansion Lands. This geographic area measures approximately 190 hectares in area, and is located within the City of Welland's Urban Area. The lands are predominantly designated for Greenfield development, with some Built-up Area in the western part of the Plan.

This Plan Area is generally situated with the Town of Pelham and City of Thorold Municipal Boundaries to the north, commercially zoned lots along Niagara Street to the east, existing

residential and Niagara College to the south, and Clare Avenue / Line Road and the Pelham Municipal Boundary to the west.

A map showing the visual extend of the NWSP Area is included below in Figure 2.

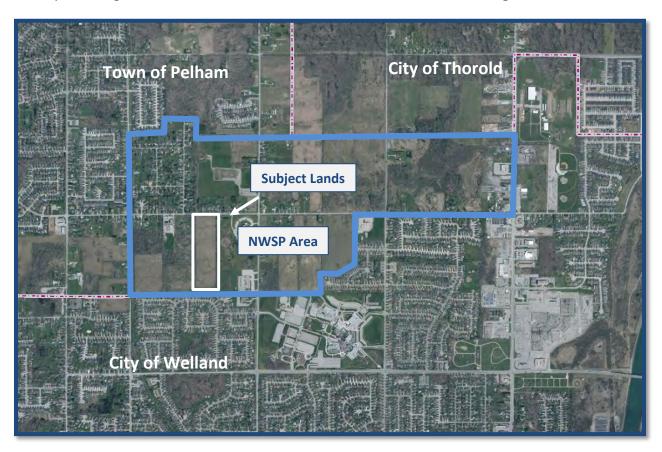

Figure 2 – Aerial View of the NWSP Area (Cropped from Niagara Navigator)

The NWSP Area is well-serviced by Regional and Local roads including Quaker Road which runs east-west through the area and a planned extension of Merritt Road (a Regional Arterial Road) which runs east-west beyond the northern portion of the Area. Line Avenue/Clare Avenue, Rice Road and First Avenue all run north-south through the area.

Municipal sanitary sewers and water services (with capacity to accommodate the proposed development) are located at the boundary of the NWSP Area and will be extended within the development at the developers' cost to service the development.

As shown in **Figure 2**, the subject lands are in the western portion of the Plan Area along Quaker Road.

Property Context

The subject lands are 7.057-hectares in total area with approximately 142-metres of frontage along the south side of Quaker Road.

The subject lands consist entirely of agricultural lands.

The property is located within the Welland Urban Area Boundary, more specifically the NWSP Area, and is within the designated Greenfield Area per the Niagara Official Plan (2022).

Adjacent Lands

The subject lands are located within the Urban Boundary Expansion Area, and are surrounded by existing and planned urban land uses. These uses are outlined as follows;

North: A mix of residential and the former soccer club lands proposed for future

development

South: Existing residential subdivisions

East: Existing residential use, open space, the Niagara Catholic District School Board

administrative building, and Alexander Kuska Catholic Elementary School

West: Vacant lands designated for low density residential uses and Nouvel Horizon

French Elementary School

THE PROPOSED DEVELOPMENT

The applicant is proposing the development of a subdivision that includes;

- Nineteen (19) Lots of single detached dwellings;
- Twenty-one (21) Blocks that include one hundred and seven (107) street townhouse dwellings;
- Two (2) Blocks that include sixteen (16) back-to-back townhouse dwellings;
- One (1) Block for a future condominium being 1.130 hectares in area;
- One (1) Block for parkland being 0.576 hectares in area;
- One (1) Block for a stormwater management facility being 0.629 hectares in area;
- Two (2) Blocks for 3.0-metre road widening;
- Two (2) Block for 0.3-metre reserves;
- Roadways

The proposed subdivision will yield one hundred and forty-two (142) residential dwelling units, excluding condominium Block 45. Block 45 is proposed to have a minimum of 29 units per hectare and will be subject to a future pre-consultation and development application process once a proposed concept for development is known for the lands.

The proposed Draft Plan of Subdivision is shown below in Figure 3 and Appendix I to this report.

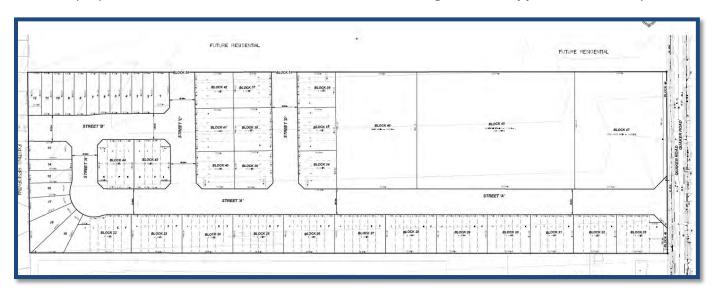

Figure 3 - Draft Plan of Subdivision

Housing Form

Single-detached dwellings, street townhouses and back-to-back townhouses are proposed for this subdivision. All units will be under freehold tenureship. Block 45 will contain future condominium units.

There are nineteen (19) single-detached dwellings proposed, that have smaller lot frontages ranging from 8.53-metres to 13.94-metres.

The street townhouses have interior lot frontages of 6.10-metres, with exterior lot frontages of 7.7-metres to 9.81-metres. There are twenty-one (21) street townhouse blocks with four (4) to six (6) units per block, for a total yield of one hundred and seven (107) street townhouse units.

There are two (2) back-to-back townhouse blocks, with a total of sixteen (16) units. The interior units have frontages of 6.4-metres, with exterior units ranging from 7.6-metres 8.07-metres.

Condominium Block 45 will be subject to future planning applications to permit implementation. However, medium density-built forms such as an apartment building, block townhouses, and multiple dwellings including back-to-back townhouses and stacked townhouses will be considered. This block will contain a minimum of twenty-nine (29) dwelling units.

These dwelling types are appropriate for this Secondary Plan Area as they will be compatible with the existing and future surrounding land uses. These dwelling types will provide a range of built forms that will contribute to the diversification of the housing supply within the municipality. The proposed development forms adhere to the objectives of the Niagara Region and local Official Plans.

<u>Transportation Systems</u>

The subject lands are accessible by a private vehicle and active transportation (walking/cycling). All dwelling units will front onto the internal road network.

Block 45 will be accessible by Street 'A' of the proposed subdivision, and will have a private internal road network.

There is one main public roadway into the proposed subdivision that traverses north/south through the subdivision which intersects on the south side of Quaker Road and shown as Street 'A'. Streets 'B', 'C' and 'D' all intersect with Street 'A'. Street 'B' will connect with Northwood Drive to the south and Streets 'C' and 'D' will provide connections to the west to future residential lands.

The streets are public roads with a cross-section of 20-metres and sidewalks are provided throughout the subdivision.

Public transit services have not been fully expanded to this portion of the municipality, as it is within a new Secondary Plan area, nonetheless, it is anticipated that improvements will be made to transit routes and facilities within the Northwest Welland Secondary Plan area to accommodate transit users more effectively as the area builds out.

Natural Heritage and Hazards

The following natural heritage features were identified in the vicinity of the subject lands;

- Other wetland and generalized candidate significant wildlife habitat;
- Other woodland and generalized candidate significant wildlife habitat;
- Indirect fish habitat

Woodlands are mapped west of the subject lands, while hedgerows are identified on the property to the east, while no watercourses were mapped on the subject lands.

It was concluded that there will be no direct impact to any of the identified features, and given existing separation from the features, the potential for indirect impacts is also considered to be minimal.

Headwater Drainage features were also investigated, and it was concluded that the features are poorly defined swales with only slight depressions that provide some ephemeral flow conveyance. However, it was concluded that the features may be removed from the landscape, provided their hydrological function is maintained through stormwater management techniques.

Overall, the development of the subject lands will not pose any negative impacts on the surrounding natural heritage features and associated functions.

Parks and Open Spaces

The proposed development will include public parkland. A 0.576-hectare park will be dedicated to the City to provide parkland for the surrounding neighbourhood, and is shown as Block 46 on the Draft Plan. This minor over-dedication will require compensation from the municipality upon Registration.

REQUIRED APPLICATIONS

A pre-consultation meeting was held on May 18th, 2024 to discuss the applications.

As outlined by City of Welland planning staff, applications for an Official Plan Amendment, Zoning By-law Amendment and Draft Plan of Subdivision are required to facilitate the proposed development.

As set out within the pre-consultation agreement, complete application requirements for the required applications include:

- Planning Justification Report
- Draft Plan of Subdivision
- Draft Official Plan Amendment
- Draft Zoning By-law Amendment
- Archaeological Assessment and MCM Acknowledgement Letter
- Environmental Impact Study and Headwater Drainage Feature Investigation
- Geotechnical Investigation
- Functional Servicing Report and Stormwater Management Plan

The MCM Acknowledgement Letter and a Geotechnical Investigation will be provided through the conditions of draft plan of subdivision approval.

A copy of the Pre-consultation Agreement is included as **Appendix II** to this report.

An Official Plan Amendment application and Zoning By-law Amendment application are required to align the land use designations and zoning with the proposed land uses within the Northwest Welland Secondary Plan Area. A Draft Plan of Subdivision is also submitted in order to implement the lots and blocks within this proposed development. This report has been prepared to address the requirement for a Planning Justification Report supporting the development plan.

The scope of the submitted applications is as follows:

Official Plan Amendment

An Official Plan Amendment has been submitted to change the land use designation from "Low Density Greenfield Residential" and "Open Space & Recreation" to "Low Density Greenfield Residential – Special Policy Area", "Medium Density Residential – Special Policy Area" and "Open Space & Recreation."

In order to permit the increased density and scale, an amendment is requested to designate the

condominium block (Block 43) as Medium Density Residential – Special Policy Area. It is proposed that the remainder of the residential uses within the subdivision be designated as Low-Density Greenfield Residential – Special Policy Area, as the proposed density is greater than the maximum density within the Low-Density Residential designation. To add, it is requested that multiple dwellings be considered as permitted uses within this land use designation.

Section 4.2.2.2A	is to be amended to permit a maximum density of 60 dwelling units per net hectare
Section 4.2.2.2B	is to be amended to include multiple dwellings as a permitted use
Section 4.2.2.3A	is to be amended to permit a maximum density of 125 dwelling units per net hectare
Section 4.2.2.3B	is to be amended to permit multiple dwellings and mid-rise apartment buildings
Section 4.2.2.3C	is to be amended to permit mid-rise development (4-8 storeys)

The requested Open Space & Recreation designation change is to recognize the location of the proposed park block and the stormwater management block. The park block is shifting somewhat from what was shown in the Secondary Plan, but remains in the same general area and a stormwater management facility was not shown on the Secondary Plan land use schedule and is required.

The proposed amendments are in alignment with the draft Official Plan, and maintain the intent of the proposed residential land use designations.

The Draft Official Plan Amendment is included as **Appendix III** to this report.

Zoning By-Law Amendment

A Zoning By-law Amendment has been submitted to address zoning compliance matters and to align the zoning with the proposed land uses. The proposed zoning will rezone the lands from "Agriculture – A1" zone to "Site-Specific Low Density Residential 2 – RL2-XX", "Site-Specific Medium Density Residential – RM-XX", and "Neighbourhood Open Space - O1".

The following Amendments are requested;

Section 5: General Provisions

Section 5.10.5a)	Open or roofed porches and stairs may project 1.5 metres into any	
	required front or exterior side yard and 3.0 metres into any rear	
	yard, provided the structure is not higher than 1.5 metres from	
	grade	

Section 5.10.5e) Decks may project a maximum of 3.75 metres into the required

rear yard, provided said deck is not higher than 2.4 metres above

grade.

Section 6: Parking and Loading Regulations

Section 6.1.6b) Parking Space Dimensions Delete

Section 6.7 Bicycle Parking Delete for Multiple Dwelling

Section 6.9.3a) 1.5 m of a street line

Section 7.3: Regulations for Residential Zones - Residential Low Density 2 (RL2-XX)

Single-Detached Dwellings

Minimum Lot Frontage 8.5 m

Minimum Front Yard 3.0 m to dwelling Minimum Interior Side Yard 0.6 m on one side

1.2 m on the other side

Maximum Lot Coverage Delete
Minimum Landscaped Area Delete

Street Townhouse with Garage Facing Front Lot Line

Minimum Front Yard 3.0 m to dwelling

Maximum Lot Coverage Delete
Minimum Landscaped Area Delete

Section 7.3: Regulations for Residential Zones – Medium Density Residential (RM-XX)

Apartment (Block 45)

Minimum Rear Yard 3.0 m Maximum Lot Coverage Delete

Block Townhouse (Block 45)

Minimum Front Yard 3.0 m to dwelling

Maximum Lot Coverage Delete

Multiple Dwelling (Block 45)

Minimum Front Yard 3.0 m to dwelling

Minimum Interior Side Yard 1.5 m Minimum Rear Yard 3.0 m Maximum Lot Coverage Delete

Multiple Dwelling (Block 43 & 44)

Minimum Lot Frontage6.4 mMinimum Front Yard3.0 mMinimum Interior Side Yard1.2 mMinimum Exterior Side Yard1.2 m

Minimum Rear Yard No required where lot line is the dividing line between

attached units

Maximum Lot Coverage Delete
Minimum Landscaped Area Delete

The Draft Zoning By-law Amendment is included as **Appendix IV** to this report.

Draft Plan of Subdivision

The proposed Draft Plan of Subdivision will implement the lots and blocks within the plan area. The plan proposes a stormwater management facility, parkland and condominium block, and a variety of dwelling types including single-detached dwellings, street townhouse dwellings and back-to-back townhouse dwellings. The road network will be integrated into the existing and future road networks. Through the registration of the Subdivision, the Quaker Road road widening blocks, parkland block and stormwater management facility block will be dedicated to the City.

A copy of the Draft Plan of Subdivision is included as **Appendix I** to this report.

RELATED STUDIES AND REPORTS

Consistent with the submission requirements outlined during pre-consultation (see **Appendix II**) and in addition to this Planning Justification Report, the studies and reports listed below have been submitted with the Draft Plan of Subdivision, Official Plan Amendment and Zoning By-law Amendment applications. A brief overview of their conclusions is provided below. Please refer directly to the reports and studies for more detailed information.

Functional Servicing Report / Stormwater Management Plan (Upper Canada Consultants)

A Functional Servicing Report, inclusive of a Stormwater Management Plan, has been prepared by Upper Canada Consultants and submitted with the applications. This Report outlines how the proposed development will be serviced with water, sanitary and stormwater infrastructure.

This Functional Servicing Report addresses the municipal servicing requirements for the proposed development, as well as the development fronting on the east side of Clare Avenue. It assesses the available municipal servicing capacity for the development area bound by Quaker Road on the north, Clare Avenue on the west, to the eastern limit of the Niagara Catholic District School Board property, and north Northwood Drive.

Based on the information provided through the Report, it was determined that;

- 1. The upgraded municipal watermain system is expected to have adequate capacity to provide both domestic and fire protection water supply for the subject lands.
- 2. The receiving 600mm diameter Regional sanitary sewer on Quaker Road, the Towpath SPS and associated forcemain, and Welland WWTP are expected to have adequate capacity for the lands upon full built-out of the NWSP Area.
- 3. Based on the Stormwater Management Plan;
 - a. Infiltration techniques are not suitable for this site as the primary control facility due to the low soil infiltration rates
 - A single proposed stormwater management wet pond facility will provide stormwater quality, quantity and erosion controls to the proposed development. This facility can be constructed in two stages to accommodate varying development timelines
 - c. Multiple stormwater management facilities external to the subject lands will provide stormwater quality, quantity and erosion controls for the respective catchment areas, to be addressed in separate SWM Reports as part of forthcoming Planning Act Applications.
 - d. Various lot level vegetative stormwater management practices can be implemented to enhance stormwater quality.

Stage 1 Archaeological Assessments (ASI Archaeological and Cultural Heritage Services)

A Stage 1 Archaeological Assessment was completed for the entirety of the NWSP Area by ASI Archaeological and Cultural Heritage Services in 2018. This Study concluded that the entirety of the Secondary Plan Area is deemed to contain Archaeological potential and recommended that all future development applications within the NWSP Area must complete a Stage 2 Archaeological Assessment.

Stage 1-2 Archaeological Assessments (Detritus Consulting Ltd.)

A Stage 1-2 Archaeological Assessment was conducted by Detritus Consulting Ltd. in 2022. Based on the results and the documentation of artifacts, a Stage 3 archaeological site-specific assessment was recommended for a portion of the subject lands. A Ministry Acknowledgement Letter is forthcoming.

Stage 3 Archaeological Assessments (Detritus Consulting Ltd.)

A Stage 3 Archaeological Assessment was conducted for a portion of the subject lands. Artifacts were discovered, though they did not fulfill the criteria for a Stage 4 archaeological investigation and the site does not retain further cultural heritage value or interest. Therefore, no future investigations are required and a Ministry Acknowledgement Letter is forthcoming.

Environmental Impact Study (GEI Consultants)

An EIS was prepared by GEI Consultants to address potential impacts of the proposed development. Study components included; a review of existing background information, policies and legislation applicable to the subject lands in its regional context; a field review and description of the natural environmental features and functions on, and immediately adjacent within 120-metres of the subject lands through the completion of ecological site investigations; an evaluation of the sensitivity of the natural heritage features, and their functions on the subject lands; a description of the proposed development; identification and discussion of the impacts that could affect the natural heritage features, as a result of the proposed development; recommendations for mitigation to avoid or minimize impacts and suggested restoration efforts.

Through the EIS, other wetland, other woodland and indirect fish habitat were identified on or in the vicinity of the subject lands. The impacts on these natural heritage features and their associated functions were assessed and it was concluded that there will be no direct impact to any of the identified features, and given existing separation from these features, the potential for indirect impacts is also considered minimal.

Mitigation measures were recommended to minimize any potential impacts on these features;

- Maintenance of water flows to existing levels at the downstream point at Quaker Road and Rice Road;
- Implementation of an erosion and sediment control and emergency spill response plan;

The potential Headwater Drainage Features were also assessed and based on the nature of the identified features it was determined that they may be removed from the landscape provided their hydrological function is maintained through stormwater management techniques.

With the implementation of the mitigation measures, the development of the subject lands can be completed without negative impacts on the nearby natural heritage features and associated functions.

PROVINCIAL LEGISLATION AND PLAN

Development applications within the City of Welland are subject to the Ontario *Planning Act* (R.S.O. 1990) and 2024 Provincial Planning Statement. An assessment of how the submitted applications satisfy applicable Provincial legislation and policies is provided below.

PLANNING ACT (R.S.O. 1990)

The *Planning Act* regulates land use planning in the Province of Ontario. The *Act* prescribes matters of Provincial Interest with regard to land use planning and the necessary procedures to be adhered to when making applications for development.

Section 2 - Matters of Provincial Interest

Section 2 of the *Planning Act* addresses matters of Provincial interest that a planning authority must have regard for when contemplating a land use planning application. Matters of Provincial Interest include:

- a. the protection of ecological systems, including natural areas, features and functions;
- b. the protection of the agricultural resources of the Province;
- c. the conservation and management of natural resources and the mineral resource base;
- d. the conservation of features of significant architectural, cultural, historical, archaeological or scientific interest;
- e. the supply, efficient use and conservation of energy and water;
- f. the adequate provision and efficient use of communication, transportation, sewage and water services and waste management systems;
- g. the minimization of waste;
- the orderly development of safe and healthy communities;
 (h.1) the accessibility for persons with disabilities to all facilities, services and matters to which this Act applies;
- i. the adequate provision and distribution of educational, health, social, cultural and recreational facilities;
- j. the adequate provision of a full range of housing, including affordable housing;
- k. the adequate provision of employment opportunities;
- the protection of the financial and economic well-being of the Province and its municipalities;
- m. the co-ordination of planning activities of public bodies;
- n. the resolution of planning conflicts involving public and private interests;
- the protection of public health and safety;
- p. the appropriate location of growth and development;

- q. the promotion of development that is designed to be sustainable, to support public transit and to be oriented to pedestrians;
- r. the promotion of built form that,
 - i. is well-designed,
 - ii. encourages a sense of place, and
 - iii. provides for public spaces that are of high quality, safe, accessible, attractive and vibrant;
- s. the mitigation of greenhouse gas emissions and adaptation to a changing climate. 1994, c. 23, s. 5; 1996, c. 4, s. 2; 2001, c. 32, s. 31 (1); 2006, c. 23, s. 3; 2011, c. 6, Sched. 2, s. 1; 2015, c. 26, s. 12; 2017, c. 10, Sched. 4, s. 11 (1); 2017, c. 23, Sched. 5, s. 80.

With regard to these matters, the applications specifically implement subsections a), d), f), h), i), j), l), p), q), and r).

a) the protection of ecological systems, including natural areas, features and functions;

As part of the Secondary Plan process, natural heritage features and hazard areas were generally mapped and subsequently designated within the Secondary Plan Schedule of the Official Plan (Schedule G: Northwest Welland Secondary Plan). The Official Plan has no components of the core natural heritage system mapped on the subject lands. Appendix 1 Map 4 of the Secondary Plan shows a conceptual potential natural heritage corridor through the subject lands from a PSW to the northeast to the significant woodlands to the west following along a headwater drainage feature. An EIS was required to assess whether the development can be located, designed and constructed to maintain the ecological functions of the potential corridors.

The EIS noted that there is no functional or ecological exchange occurring within this potential corridor between the identified woodland west of the subject lands and the PSW east of the subject lands along the proposed corridor.

Overall it was determined that there will be no direct impact to any features in the vicinity of the subject lands, and given the existing separations, the potential for indirect impacts are also minimal.

Mitigation measures were also provided minimize any potential impacts on the nearby features, and considering all details provided in the EIS, the development of the subject lands can be completed without negative impacts on the natural heritage features and associated functions.

d) the conservation of features of significant architectural, cultural, historical, archaeological or scientific interest;

A Stage 1 Archaeological Assessment was completed for the entirety of the NWSP Area by ASI Archaeological and Cultural Heritage Services in 2018. This Study concluded that the entirety of the Secondary Plan Area is deemed to contain Archaeological potential and recommended that all future development applications within the NWSP Area must complete a Stage 2 Archaeological Assessment.

A Stage 2 Archaeological Assessment was conducted and the field assessment resulted in the discovery of mainly Euro-Canadian artifacts, almost exclusively ceramics and household artifacts. As such, a Stage 3 Archaeological Assessment was completed by Detritus Consulting Ltd. for the subject lands. This Assessment conclude that no further assessments are required for the subject land as the assemblage of artifacts do not fulfill the criteria for a Stage 4 investigation. Ministry Acknowledgement is forthcoming and will be provided through the clearance of draft plan of subdivision conditions.

f) the adequate provision and efficient use of communication, transportation, sewage and water services and waste management systems;

Through the preparation of the NWSP, the City of Welland undertook servicing and transportation studies to justify and inform the application to expand the urban area and implement secondary planning. A Transportation Impact Study was not required for the proposed residential development.

Along with this submission is a Functional Servicing Report with a Stormwater Management Plan that further supports the development of the proposed lands for residential uses within the NWSP Area.

The subject lands are designated to permit urban development. The applications will facilitate development that will utilize future infrastructure investments such as roads, watermains, sanitary sewer, storm sewer and typical utilities.

The proposed subdivision will also be serviced by and provided with Regional waste collection.

h) the orderly development of safe and healthy communities;

(h.1) the accessibility for persons with disabilities to all facilities, services and matters to which this Act applies;

The subject lands are designated for residential growth and development that will contain

a public park. These uses have been contemplated as part of previous planning approvals associated with the NWSP Area.

The orderly development of healthy and safe communities is best achieved through a proactive and detailed planning process, such as secondary or master planning. The street system will be designed to be safe and in accordance with the City Engineering Standards. In addition, the pedestrian system including on-street sidewalks will be designed to meet accessibility and safety standards for pedestrians.

The proposed residential development is appropriately located along Quaker Road. The proposed development accommodates residential and open space uses that are compatible and contiguous with the proposed and surrounding existing neighbourhoods. The location is accessible and opportune for residential development as it is within a planned community. The inclusion of additional housing opportunities and forms contributes to the orderly development of safe and healthy communities, fostering a cohesive and balanced community.

i) the adequate provision and distribution of educational, health, social, cultural and recreational facilities;

The proposed development is near several schools including;

- Alexander Kuska Catholic Elementary School
- Nouvel Horizon French Elementary School
- Quaker Road Public School
- Welland Centennial Secondary School
- Niagara College Welland Campus

A future public park is being proposed on the subject lands. The lands are also in close proximity to recreational spaces such as the Welland Sports Complex, places of worship, the Seaway Mall, medical centres, pharmacies, fitness facilities, restaurants, grocery stores, the public library and more are all within 2-kilometres of the subject lands.

The subject lands are considered to be supported by an adequate amount of educational, health, social, cultural and other recreational facilities located throughout the City.

j) the adequate provision of a full range of housing, including affordable housing;

The NWSP land use plan identifies lands for a variety of land uses including low and medium-density residential uses, mixed use, institutional, open space and environmental conservation and protection.

The proposed residential development will include one hundred and forty-two (142) dwelling units including single-detached dwellings, street townhouse dwellings, and back-to-back townhouse dwellings. The proposed subdivision will also include a condominium block that will provide more housing opportunities with a minimum of twenty-nine (29) additional dwelling units.

Though these dwelling units will not be considered affordable by the Provincial definition, they will contribute to affordability by increasing the supply of housing within the city and achieving a broader range of housing choice with different price points and tenureship.

I) the protection of the financial and economic well-being of the Province and its municipalities;

The proposed development can benefit the financial and economic well-being of the Province and its municipalities as cumulatively it will introduce one-hundred and forty-two (142) new residential dwelling units within the City of Welland, with an additional condominium block that will provide more housing options. The addition of these units improves housing availability in the City and contributes to the overall economic resilience and vitality of the area.

The proposed developments will also generate development charges and long-term property tax revenue. These economical and financial contributions support the sustainable growth and prosperity of the Region and municipality, which subsequently supports the local economy. Additionally, the residential development at the density proposed is financially more sustainable than traditional low-density residential development.

p) the appropriate location of growth and development;

The subject lands are located within the Welland Settlement Area / Urban Area Boundary, which is a preferred and prescribed location for growth in Provincial, Regional and local land use planning documents. The subject property is also situated within a designated Greenfield Area boundary, which has a minimum density target of 50 people and jobs per hectare. The appropriateness of this location for residential development was established through the completion of the NWSP.

The subject lands are not encumbered by any significant physical, geographic or environmental constraints, and benefit from proximate transportation networks and existing municipal infrastructure.

The subject lands are located adjacent to Quaker Road, and can be serviced by various existing schools, community facilities and nearby commercial opportunities. The utilization of

these undeveloped urban lands for residential growth and open space use maximizes housing potential and reinforces the property as an appropriate location for growth and development, as well as neighbourhood recreational opportunities.

The subject lands are located within the City of Welland Settlement Area Boundary and Regionally Designated Greenfield area, and are provided with municipal services in an area planned for growth, therefore the subject lands are an appropriate location for growth and development.

q) the promotion of development that is designed to be sustainable, to support public transit and to be oriented to pedestrians;

The introduction of increased residential density to this area contributes to the promotion of transit-supportive communities. This, in turn, enhances the future sustainability and expansion of public transit services within the community.

As set forth in the updated Transportation Assessment prepared by Associated Engineering (2023) for the NSWP area, this area is a prime location for the development and expansion of active transportation routes and public transit services.

The proposed development will include sidewalks in addition to the planned improvements to Rice Road and Quaker Road that will include cycling lanes and a multi-use trail. In addition, the subject lands are near a future multi-use trail that will traverse through the NWSP Area and will provide greater opportunities for recreation as well as active transportation and connectivity.

Overall, the proposed development will facilitate the design of a pedestrian friendly neighbourhood that will be supportive of future public transportation opportunities.

r) the promotion of built form that,

- a. is well-designed,
- b. encourages a sense of place, and
- c. provides for public spaces that are of high quality, safe, accessible, attractive and vibrant;

The proposed subdivision design exhibit good urban design principles and engage positively with the public realm along Quaker Road. The inclusion of urban elements will improve the current visual condition of the property to the benefit of the surrounding lands and future residents.

The proposed development will be well-designed with an attractive built form. The

preliminary development plans emulate both traditional and modern development characteristics that will integrate with other proposed development in the surrounding neighbourhood. The proposed dwelling units have been thoughtfully designed to provide a variety of housing to adhere to all demographics.

The proposed development includes both a sidewalk system for connectivity to adjacent areas, and public parkland. These inclusions will be designed to be safe, accessible, attractive and vibrant in accordance with the City's standards.

Section 3 of the *Planning Act* requires that, in exercising any authority that affects a planning matter, municipalities "shall be consistent with the policy statements" and "shall conform to the Provincial plans that are in effect on that date, or shall not conflict with them, as the case may be."

The following sections of this report outline how the submitted applications satisfy the requirements of the *Planning Act*, are consistent with the Provincial Policy Statement and conform with the Growth Plan.

Section 22 – Official Plan Amendments

Applications for Official Plan Amendments are considered under Section 22 of the *Planning Act*. Amendments to municipal by-laws are permitted, subject to the provision of prescribed information. This application has been filed with the required fee and supporting materials requested through pre-consultation.

Section 34 – Zoning By-laws and Amendments

Applications for Zoning By-law Amendments are considered under Section 34 of the *Planning Act*. Amendments to municipal by-laws are permitted, subject to the provision of prescribed information. This application has been filed with the required fee and supporting materials requested through pre-consultation.

Section 51 – Draft Plans of Subdivision

Applications for Land Division are governed under Section 51 of the *Planning* Act and in particular must have regard for the matters under Section 51(24) of the *Planning Act*.

Section 51 (24) the Planning Act prescribes that "In considering a draft plan of subdivision, regard shall be had, among other matters, to the health, safety, convenience, accessibility for persons

with disabilities and welfare of the present and future inhabitants of the municipality and to," items a) to m). An overview of how each item is addressed is provide below.

a) the effect of development of the proposed subdivision on matters of provincial interest as referred to in Section 2;

As noted above, the applications satisfy clauses a), d), f), h), i), j), l), p), q), and r) of Section 2 of the *Planning Act*.

b) whether the proposed subdivision is premature or in the public interest;

The proposed subdivision is within the Northwest Welland Secondary Plan Area, an area that is planned for new development and is in the public interest. The proposed subdivision is not considered premature as significant work has been undertaken to provide for development in this area. The lands can be readily serviced, there are no constraints to developing the lands and the proposal provides for a variety of housing choice.

The subject site is surrounded by existing low density residential and general institutional uses, and will be surrounded by future low and medium density residential dwellings along with mixed uses. The lands have full access to services and utilities, and has access to public roadways.

The proposed development addresses the demand for a variety of housing types, fulfilling a market need. The development contributes to the diversification and expansion of available housing supply in the area, and will efficiently utilize current underutilized urban serviced land.

Considering the lands are within a Secondary Plan area, the proposed subdivision is within the public interest and not considered premature, as it is an area planned for development that represents a logical location for residential development that can be readily serviced.

c) whether the plan conforms to the official plan and adjacent plans of subdivision, if any;

The subject lands are within the Northwest Welland Secondary Plan Area and the proposed development is consistent with the surrounding proposed land uses, creating a contiguous development pattern and connectivity with adjacent plans of subdivision, while gently introducing increased density. The proposed development will represent the overall vision for this Secondary Plan area, by providing a compact development that accommodates an appropriate mix of housing types. A more detailed review of Official Plan conformity is provided further on in this report, however it is noted that an Official Plan Amendment application has been submitted to provide for increased residential density and open space.

d) the suitability of the land for the purposes for which it is to be subdivided;

The property is located in a suitable location for development as it is within a Secondary Plan Area and along a Regional Road and within an area planned for development. It has full municipal services available to it and is free of significant development encumbrances and natural heritage features. The property is generally flat and is ready for residential development. Therefore, the land is considered to be appropriate for the intended subdivision development.

(d.1) if any affordable housing units are being proposed, the suitability of the proposed units for affordable housing;

While the applications do not include affordable housing as defined by the Province of Ontario, the proposed development actively contributes to the availability of housing which in turn can lead to improved housing attainability. The proposed development includes single-detached dwellings and two varieties of townhouses, providing a range of housing that will vary in price. This subdivision also includes a condominium block. Dwellings under condominium tenureship are generally more affordable than freehold tenureship. These efforts promote housing that is attainable to a wider range of residents, prioritizing inclusivity and meeting the diverse housing needs of the community.

e) the number, width, location and proposed grades and elevations of highways, and the adequacy of them, and the highways linking the highways in the proposed subdivision with the established highway system in the vicinity and the adequacy of them;

The proposed road network consists of public roadways with 20-metre cross-sections and will be designed in accordance with the City engineering standards. This residential development will be provided access by way of Quaker Road. Quaker Road will be improved in this area.

f) the dimensions and shapes of the proposed lots;

The applications propose the creation of rectangular shaped lots which form a lotting pattern that is consistent with the surrounding proposed residential development and existing, established neighbourhood. The proposed lot dimensions and shapes are shown on the Draft Plan.

g) the restrictions or proposed restrictions, if any, on the land proposed to be subdivided or the buildings and structures proposed to be erected on it and the restrictions, if any, on adjoining land;

There are no restrictions on the proposed development.

h) conservation of natural resources and flood control;

It was concluded in the EIS that the nearest identified regulated area is more than 100-metres east of the subject lands and that the Headwater Drainage Features may be removed from the landscape provided their ephemeral hydrological function is maintained through stormwater management techniques.

i) the adequacy of utilities and municipal services;

A Functional Servicing Report, prepared by Upper Canada Consultants, outlines how the proposed development will be serviced has been submitted with the applications. As confirmed in the report, municipal infrastructure is readily available, and has sufficient capacity to service the proposed development. Other local servicing utilities are also available and the proposed development will also be serviced by local utilities.

j) the adequacy of school sites;

The subject lands are in close proximity to several schools;

- Alexander Kuska Catholic Elementary School
- Nouvel Horizon French Elementary School
- Quaker Road Public School
- Welland Centennial Secondary School
- Niagara College Welland Campus

The local school boards (DSBN, NCDSB) will have the opportunity to comment on development applications to confirm adequacy of service. Through the Secondary Plan process no new school sites were identified as needed in this area.

k) the area of land, if any, within the proposed subdivision that, exclusive of highways, is to be conveyed or dedicated for public purposes;

The stormwater management block and park block are proposed to be dedicated to the City upon registration of the Subdivision. In addition, a 3-metre road widening is proposed to be provided to the City along the south side of Quaker Road in order to assist with the urbanization of the roadway to provide sidewalks and bicycle paths.

the extent to which the plan's design optimizes the available supply, means of supplying, efficient use and conservation of energy; and

The coordinated development of a large parcel of land provides for increased efficiencies in the servicing and construction of the development. Further, the proposed development achieves a compact land use pattern that helps to optimize the use of infrastructure and provides improved energy efficiencies over a subdivision solely inclusive of single-detached dwellings.

Energy efficient design may also be explored through the development of detailed building plans.

m) the interrelationship between the design of the proposed plan of subdivision and site plan control matters relating to any development on the land, if the land is also located within a site plan control area designated under subsection 41 (2) of this Act or subsection 114 (2) of the City of Toronto Act, 2006. 1994, c. 23, s. 30; 2001, c. 32, s. 31 (2); 2006, c. 23, s. 22 (3, 4); 2016, c. 25, Sched. 4, s. 8 (2).

The proposed development is subject to Draft Plan of Subdivision approval which ensures that all matters affecting the approval authority and commenting agencies are adequately addressed prior to the commencement of development and that the subdivision will be designed in accordance with City and Regional design standards as appropriate. The proposed land uses include single-detached dwellings, street townhouse dwellings and back-to-back townhouse dwellings are exempt from Site Plan Control. The condominium block will be subject to future site plan approval prior to being developed.

2024 PROVINCIAL PLANNING STATEMENT (PPS)

The Provincial Planning Statement, 2024, is a streamlined province-wide land use planning policy framework that replaces both the Provincial Policy Statement, 2020 and A Place to Growth; Growth Plan for the Greater Golden Horseshoe, 2019 while building upon housing-supportive policies from both documents.

It provides municipalities with the tools and flexibility required to build more homes, enabling them to:

- plan for and support development, and increase the housing supply across the province
- align development with infrastructure to build a strong and competitive economy that is investment-ready
- foster long-term viability of rural areas
- protect agricultural ands, the environment, public health and safety

The PPS sets the policy foundation for regulating the development and use of land province-wide, helping achieve the provincial goal of meeting the needs of a fast-growing province while enhancing the quality of life for all Ontarians.

Planning for People and Homes (PPS 2.1)

Section 2.1 of the PSS provides guidance for population forecasts, and required municipalities and planning authorities to provide sufficient land to accommodate an appropriate range and mix of land uses to meet projected needs informed by provincial guidance.

Section 2.1.6 directs that planning authorities should support the achievement of complete communities by;

- accommodating an appropriate range and mix of land uses, housing options, transportation options with multimodal access, employment, public service facilities, and other institutional uses, recreation, parks and open space, and other uses to meet longterm needs;
- improving accessibility for people of all ages and abilities by addressing land use barriers which restrict their full participation in society; and
- improving social equity and overall quality of life for people of all ages, ability, and incomes, including equity-deserving groups.

The applications are consistent with the direction of Section 2.1 of the PPS as they facilitate the development of additional housing opportunities on urban, serviced lands within a Secondary Plan Area that is anticipated for growth and development.

The proposed subdivision will contribute to the achievement of a complete community by providing a mix of housing opportunities in an area that is planned to be supported by a variety of transportation options, institutional uses, and recreational uses. The proposed plan of subdivision provides appropriate lands to be used for parks and recreation purposes through the creation of parkland. Further, the subdivision will be designed to meet accessibility requirements to ensure people of all ages and abilities can navigate safely within the development and the range of housing choice and recreational land proposed is targeted towards providing improved social equity and quality of life for people.

Housing (PPS 2.2)

The PPS provides that planning authorities shall provide for an appropriate range and mix of housing options and densities to meet projected needs of current and future residents by:

- a) establishing and implementing minimum targets for the provision of housing that is affordable to low- and moderate-income households, and coordinating land use planning and planning for housing with Service Managers to address the full range of housing options including affordable housing needs;
- b) permitting and facilitating:
 - 1. all housing options required to meet the social, health, economic and wellbeing requirements of current and future residents, including additional needs housing and needs arising from demographic changes and employment opportunities; and
 - all types of residential intensification, including the development and redevelopment of underutilized commercial and institutional sites (e.g., shopping malls and plazas) for residential use, development and introduction of new housing options within previously developed areas, and redevelopment, which results in a net increase in residential units;
- c) promoting densities for new housing which efficiently use land, resources, Infrastructure and public service facilities, and support the use of active transportation; and
- d) requiring transit-supportive development and prioritizing intensification, including potential air rights development, in proximity to transit, including corridors and stations.

Table 2-1 of the Niagara Official Plan forecasts that the City of Welland will have a population of 83,000 people by 2051. This anticipated growth must be supported by an increase in housing supply and a range and mix of dwelling forms of different sale price ranges.

The entirety of the Northwest Welland Secondary Plan Area is estimated to be developed with approximately 4,500 residential dwelling units. These units will consist of a range of low and medium density forms, ranging from single-detached dwellings to apartment dwellings.

As previously noted, the proposed development will contribute one hundred and forty-two (142) dwelling units, and an additional condominium block that will provide greater housing opportunities within the site. These dwellings will consist of single-detached dwellings, townhouse dwellings, and back-to-back townhouse dwellings, all under freehold tenureship. The condominium block will further contribute to the variety of built forms constructed within the proposed subdivision, and these units will be under condominium tenureship.

This development is compact and efficiently designed, contributing to a range and mix of housing options resulting in different sale price thresholds. While the proposed housing will not be defined as affordable per the provincial or regional definitions, this development increases the housing supply which directly attributes to improved affordability or attainability. This development efficiently uses underutilized lands and infrastructure, and provides a transit-supportive density.

Overall, the proposed subdivision portrays many characteristics that are desirable and appropriate for future residential development.

Settlement Areas and Settlement Area Boundary Expansions (PPS 2.3)

Section 2.3.1 details the general policies for settlement areas, as they are to be the focus of growth and development. These areas are to be based on densities and a mix of land uses that efficiently use land and resources; optimize existing and planned infrastructure and public service facilities; support active transportation; are transit-supportive, as appropriate; and freight-supportive.

In order to support the achievement of complete communities, intensification and redevelopment is to be supported by planning authorities, by planning for a range and mix of housing options and prioritizing planning and investment in the necessary infrastructure and public service facilities.

Section 2.3.1.4 to 2.3.1.6 state that minimum targets for intensification and redevelopment within built-up areas are to be established, and density targets for designated growth areas are to be encouraged to plan for a target of 50 residents and jobs per gross hectare.

The proposed residential development meets and exceeds the minimum density target of 50 residents and jobs per gross hectare, while maintaining compatibility with the existing low-density subdivisions to the south. The development will assist in optimizing both existing and planned infrastructure, efficiently utilizing underutilized land, supporting active transportation by including sidewalks throughout the site, and having an increased density that is considered to be transit-supportive.

As per Section 2.3.2, the proposed development is within an area that was selected for a settlement area boundary expansion for many reasons and as such, these lands are planned for future growth and development.

Strategic Growth Areas (PPS 2.4)

The PPS provides that planning authorities are encourage to identify and focus growth in strategic growth areas and strategic growth areas should be planned:

- a) to accommodate significant population and employment growth;
- b) as focal areas for education, commercial, recreational, and cultural uses;
- c) to accommodate and support the transit network and provide connection points for interand intra-regional transit; and
- d) to support affordable, accessible, and equitable housing.

To support the achievement of complete communities, a range and mix of housing options, intensification and more mixed-use development.

Planning authorities are to prioritize planning and investment in infrastructure and public service facilities in strategic growth areas; to identify the appropriate type and scale of development and transition of built forms for adjacent areas; to permit development and intensification to support the achievement of complete communities and a compact built form; consider a student housing strategy when planning for strategic growth areas; and support redevelopment of commercially designated retail lands to support mixed use residential uses.

The subject lands are located within the Northwest Welland Secondary Plan area which is the area of Welland that has been planned for significant population growth and an area that has been prioritized by the Region and the City for investment in infrastructure to facilitate the future growth. Through the Secondary Plan approval process, the consideration of education, commercial, recreational and cultural uses was considered in relation to appropriate areas for residential growth at differing densities.

The proposed Plan of Subdivision and corresponding Official Plan and Zoning By-law Amendment applications consider the policies of the Secondary Plan. Though there are minor amendments requested, the proposed development is in keeping with the land uses proposed for the Secondary Plan. The inclusion of Medium Density Residential with a request for an increased maximum density is to promote additional dwelling types at higher densities within the future condominium. The subdivision proposes Open Space and Recreation uses for the parkland and stormwater management facility, with the remainder of the sited being proposed to remain Low Density Greenfield Residential, though it is requested that a higher density. The proposed density

being requested is consistent with the density thresholds in the draft proposed local Official Plan update that the City is considering to adopt.

The proposed development aims to provide a greater range of housing options in an effort to achieve a compact development that is transit supportive and that will have a range of sale prices that provide options and attainability, contributing to housing equity.

Energy Conservation, Air Quality and Climate Change (PPS 2.9)

Section 2.9 directs that planning authorities must plan to reduce greenhouse gas emissions and adapt to climate change by promoting compact, transit-supportive communities, integrating climate considerations into infrastructure planning, supporting energy conservation, promoting green infrastructure and active transportation, protecting the environment, and improving air quality. Additionally, they should adopt any other measures that enhance community resilience and help mitigate climate change impacts.

The proposed development includes other built forms than solely single-detached dwellings which poses many positive benefits with respect to reducing greenhouse gas emissions. Compact form of housing such as townhouses take climate change into consideration and provides many efficiencies.

Further energy efficiencies will be explored through detailed design.

General Policies for Infrastructure and Public Service Facilities (PPS 3.1)

Section 3.1 outlines that infrastructure and public service facilities are to be provided in an efficient manner and strategically located while accommodating projected needs to provide cost-effectiveness.

As the proposed residential development is within a Secondary Plan Area, the surrounding infrastructure and services have been efficiently and cohesively planning in order to provide for an orderly development of these lands with coordinated and integrated services.

The Northwest Welland Secondary Plan and supporting studies identify the infrastructure and public service facilities that are needed, and the requirements for coordination and integration to support the land use and growth of this new planned area of Welland. The major land owners in the Plan area have entered into cost sharing agreements to equitably share the costs associate with undertaking the required infrastructure improvements. Front ending agreements with the City/Region may be required as conditions of subdivision approval to ensure that the improvements occur in a timely manner and appropriate costs recovery mechanisms are established.

Transportation Systems (PPS 3.2)

Section 3.2 policies of the PPS direct that transportation systems should be safe, energy-efficient, and facilitate the movement of people and goods, while supporting zero- and low-emission vehicles. Efficient use of existing and planned infrastructure should be prioritized, using transportation demand management strategies where feasible. Connectivity within and between transportation systems and modes should be planned, maintained, and improved, including across jurisdictional boundaries, as part of a multimodal transportation system.

The proposed street network within the Plan of Subdivision will be designed to municipal standards to provide for the safe movement of people within the development with direct access to Quaker Road and connectivity to existing and proposed subdivisions. Sidewalks will be included within the development plan to provide a safe system for pedestrian movements.

Transportation and Infrastructure Corridors (PPS 3.3)

The PPS provides that planning authorities shall plan for and protect corridors and rights-of-ways for infrastructure of all types to meet current and projected needs. Major goods movement facilities and corridors are to be protected for the long term. Also, planning authorities shall not permit development in planned corridors that could preclude or negatively affect the use of the corridor for the purpose(s) for which it was identified. New development proposed on adjacent lands to existing or planned corridors and transportation facilities should be compatible with, and supportive of, the long-term purposes of the corridor and should be designed to avoid, or where avoidance is not possible, minimize and mitigate negative impacts on and adverse effects from the corridor and transportation facilities. The colocation of linear infrastructure should be promoted where appropriate.

Quaker Road is a major transportation corridor and it is planned to be improved. The proposed Plan of Subdivision contemplates a road widening in favour of the City of Welland along the south side of Quaker Road. Quaker Road is being urbanized and will include a larger cross-section that supports both vehicular and active transportation.

Land Use Compatibility (PPS 3.5)

The policies in this section provide for that major facilities and sensitive land uses are to be planned and developed to avoid, or if avoidance is not possible, minimize and mitigate any potential adverse effects from odour, noise and other contaminant, minimize risk to public health and safety and to ensure the long-term operational and economic vitality of major facilities.

The proposed residential development is a sensitive land use that is not in proximity to any major facilities. The consideration of the appropriateness of residential uses on the subject lands was

addressed through the Northwest Welland Secondary Plan. Overall, the subject lands are compatible with the existing and future land uses within the area and land use compatibility issues with regards to noise, odour and other contaminants is not a concern.

Sewage, Water and Stormwater (PPS 3.6)

Section 3.6.1 outlines that planning for sewage and water services should prioritize accommodating forecasted growth by efficiently using and optimizing existing municipal and private communal systems. This approach ensures that services can be sustained by available water resources, remain financially viable over their lifecycle, and protect both human health and the natural environment, particularly water quality and quantity. The services should also align with broader municipal planning efforts.

Additionally, planning should encourage water and energy conservation, integrating servicing with land use considerations throughout the process, and assessing opportunities to reallocate unused capacity to support housing needs. All planning should be consistent with specific servicing policies to ensure effective and sustainable management of water and sewage services.

The planning for municipal water, municipal sewage and stormwater management systems was considered as part of the Northwest Welland Secondary Plan process with the preparation of a Conceptual Municipal Servicing Design Report. It identified required upgrades to implement the proposed future developments. This included upgrades to and extensions of existing City of Welland Sanitary and Water services. These improvements will be front ended by developers whose costs are to be split through a Developer's Group Cost Sharing Agreement.

Further, a Functional Servicing Report was prepared for the proposed development of the subject lands that confirmed with the planned improvements to Quaker Road, there is adequate capacity for domestic water supply and fire protection within the planned subdivision. To add, the receiving sanitary sewer system has adequate capacity following upgrades that are currently underway to the existing Towpath Sanitary Pumping Station. The associated forcemain and Welland Wastewater Treatment Plan are complete and the proposed internal storm sewers and stormwater management facilities provide appropriate stormwater management controls to service the development.

Section 3.6.8 suggests that stormwater management planning should be integrated with sewage and water services to ensure systems are optimized, retrofitted, and financially sustainable over their lifecycle. It aims to minimize or prevent increases in stormwater volume and contaminants, control erosion, and maintain water balance, using green infrastructure where possible.

Furthermore, planning should mitigate risks to health, safety, property, and the environment, maximize vegetative and permeable surfaces, and encourage best practices such as stormwater

reuse, water conservation, and low-impact development. Finally, it must align with comprehensive municipal plans that address the cumulative impacts of stormwater on a watershed scale.

The proposed development will include a new stormwater management facility for quality, quantity, and erosion controls. To accommodate varying development schedules within the surrounding area, it is proposed that the stormwater management facility be constructed in two stages. Stage 1 will account for the proposed facility being entirely constructed within the 575 Quaker Road lands, and will receive future stormwater flows at fully developed conditions within the 575 Quaker Road property and future development lands immediately adjacent to Clare Avenue; 607 Quaker Road will be assumed at existing conditions for Stage 1.

Stage 2 will be the expansion of the Stage 1 facility westward onto the neighbouring 607 Quaker Road property and will include this property at fully developed conditions.

Overall it is proposed to convey all future Stormwater flows from the subject lands to Towpath Drain through proposed storm sewers constructed on Quaker Road and Rice Road.

Waste Management (PPS 3.7)

The PPS provides that waste management systems need to be planned for and provided that are of an appropriate size, type and location to accommodate present and future requirements, and facilitated integrated waste management.

Waste management planning is a responsibility of the Niagara Region. The proposed subdivision has been designed in consideration of the Region's requirements to accommodate waste collection trucks.

Public Spaces, Recreation, Parks, Trails and Open Space (PPS 3.9)

Section 3.9 directed that to promote healthy, active, and inclusive communities, planning should ensure that public streets and spaces are safe, accessible, and encourage social interaction and active transportation. It should also provide diverse recreational opportunities for people of all ages and abilities, including parks, trails, and natural areas, while offering public access to shorelines. Moreover, the protection of provincial parks and conservation areas should be recognized, with efforts to minimize any negative impacts on these protected spaces.

The proposed subdivision has been planned with safety in mind. The public streets will be designed in accordance with municipal standards, ensuring the safe movement of people and vehicles. Sidewalks will be planned throughout the community to provide for safe pedestrian movements and will connect to Quaker Road. All dwellings will also face the public streets within

the subdivision which provides for eyes on the street and fosters social interactions amongst neighbours.

The proposed subdivision design includes a parkland block that is to be dedicated to the City.

Natural Heritage (PPS 4.1)

Sections 4.1.1 and 4.1.2 of the PPS outline that natural features and areas must be preserved for the long term, with a focus on maintaining or enhancing their diversity, connectivity, and ecological functions. Efforts should ensure that the biodiversity of natural heritage systems is sustained, restored, or improved where possible. This involves recognizing and preserving the connections between natural heritage areas, as well as between surface and groundwater features, to support the overall ecological health and balance of the region.

It was concluded through the investigations of the Environmental Impact Study that no natural heritage features were identified on the subject lands. Nonetheless, with the recommended mitigation measures provided in the EIS the proposed development will pose no negative impacts on the nearby natural heritage features and their associated functions.

Cultural Heritage and Archaeology (PPS 4.6)

Section 4.6 of the PPS outlines that protected heritage properties, including built heritage resources and cultural heritage landscapes, must be conserved. Development and site alteration are not allowed on lands with archaeological resources unless these resources are preserved.

Similarly, development on adjacent lands is restricted if it impacts heritage attributes. Planning authorities are encouraged to create archaeological management plans and strategies for conserving significant heritage resources. They must also engage early with Indigenous communities to ensure their interests are considered in the protection and management of archaeological and heritage resources.

The subject lands are not considered to be a protected heritage property and does not contain built heritage resources or cultural heritage landscape features. A Stage 3 Archaeological Assessment was conducted and the analysis of the artifact assemblage does not fulfill the criteria for a Stage 4 archaeological investigation. Therefore, no further archaeological assessments were recommended and Ministry Acknowledgement is forthcoming.

General Policies for Implementation and Interpretation (PPS 6.1)

This section of the PPS requires that in order to protect provincial interests, planning authorities keep their Official Plans and Zoning By-laws up to date with the Provincial Planning Statement and where a planning authority decides on a planning matter before their official plan has been

updated to be consistent with the PPS, it must still make a decision that is consistent with the PPS. In addition, wherever possible and practical approvals under the *Planning Act* and other legislation or regulation, i.e. *Environmental Assessment Act*, should be integrated provided the intent of both processes are meet. Municipalities are also encouraged to monitor and report on implementation of the policies in their official plans and density targets represent minimum standards and municipalities are encouraged to go beyond these minimum targets.

The subject applications are consistent with the policies of the PPS. It is to be noted that the proposed Official Plan Amendment will provide an increase density on the subject lands while maintaining the intent of the existing land use designation. Further, both parkland and a stormwater management facility are proposed on site, with the inclusion of a future condominium block that is proposed for medium density residential. Overall the proposed subdivision will provide a compatible mix of housing forms.

Coordination (PPS 6.2)

Section 6.2.1 details that a coordinated, integrated, and comprehensive approach is essential for effective planning across municipalities, government agencies, and service managers. This involves managing growth and development in alignment with infrastructure planning, public service facilities, and economic development strategies. It also includes the management of natural and cultural heritage, transportation, waste systems, and addressing housing needs.

Consistent with the policy direction, through the development of the Northwest Welland Secondary Plan, coordination occurred between the lower and upper tier municipalities, the Niagara Peninsula Conservation Authority, school boards and all stakeholders.

A pre-consultation meeting for the proposed development was also held on April 18th, 2024. The pre-consultation meeting allowed for upper and lower-tier municipalities and other commenting agencies to review and comment on the development proposal early in the process. This coordinated approach allows for appropriate consideration to be made during the planning stage to ensure that potential areas of concern are suitably addressed.

NIAGARA OFFICIAL PLAN (2022)

The Niagara Official Plan (NOP) outlines the long-term strategic policy planning framework for managing growth in the Region to a planning horizon ending in 2051.

The Plan's focus is primarily on implementing the Provincial Planning Statement and other Provincial Plans and Guidelines, and providing regional-level land use planning direction on growth, the natural environment, infrastructure and other attributes or circumstances unique to Niagara.

CHAPTER 2 – GROWING REGION

Chapter 2 of the NOP contains the Regional level growth policy direction for Niagara Region and the twelve (12) local municipalities inclusive of population and employment forecasts, intensification targets and specific locations and methods for development.

The NOP directs growth and development to Settlement Areas where full urban services are available, as well as public transit, community and public services and employment opportunities.

2.1 - FORECASTED GROWTH

Per Section 2.1 of the NOP, the Region of Niagara is anticipated to have a population of 694,000 people and 272,000 jobs by the year 2051, representing an increase of over 200,000 people and 85,000 jobs from 2021. These population and employment forecasts are further broken down by municipality in Table 2-1. Per Table 2-1, Welland has a forecasted population of 83,000 people and 28,790 jobs by 2051.

The proposed subdivision will contribute a minimum of one hundred and seventy-one (171) new residential dwelling units into the City's housing supply within the Northwest Welland Secondary Plan Area and will assist in achieving the City's annual growth and targets. It is noted that within this subdivision is a proposed condominium (Block 43) that does not have a confirmed unit type or count at this time. For demonstration purposes, the condominium will yield a minimum of twenty-nine (29) dwelling units in order to meet the required Official Plan requirements for the proposed Medium Density Residential land use designation (minimum 25 units/hectare). The proposed development of the condominium block will be addressed through future planning applications and at that time, the total number of dwelling units for this block will be established.

2.2 - REGIONAL STRUCTURE

Section 2.2 establishes the regional land use structure, based on Provincial directives, which dictate how the projected growth is to be accommodated. A majority of growth is to occur within

Page 39 of 74

the Settlement Area, where water and wastewater systems exist or are planned. The Settlement Area is further broken down into the delineated Built-up Area and the designated Greenfield Area.

The subject lands are located within the City of Welland Urban Area (Settlement Area) and are within the Designated Greenfield Area as per the Regional Plan shown in **Figure 4.** The subject lands also have access to existing water and wastewater systems and are therefore an appropriate location to accommodate prescribed growth.

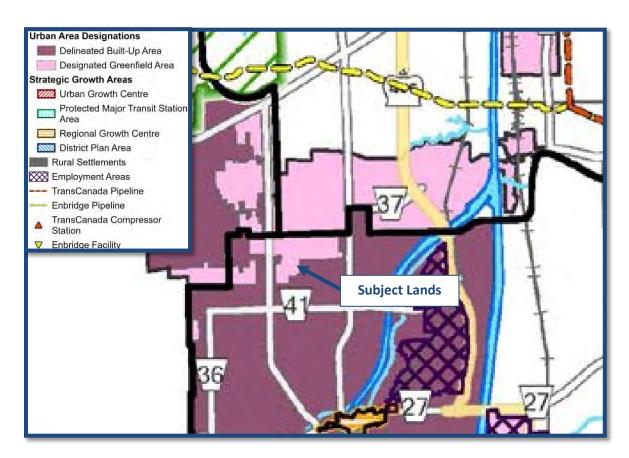

Figure 4 – Schedule 'B' of the Niagara Official Plan (Cropped)

The proposed development will contribute one hundred and forty-two (142) dwelling units, consisting of nineteen (19) single-detached dwellings, one hundred and seven (107) street townhouse dwellings, and sixteen (16) back-to-back townhouse dwellings. The proposed subdivision will also include a condominium block that is proposed for Medium Density Residential development, yielding a minimum of twenty-nine (29) dwelling units, though the number of units has yet to be determined. The subject lands are a logical location for both Low Density Greenfield Residential and Medium Density Residential, and can be serviced by existing

public roadway access and municipal infrastructure. The proposed development will assist the Region and City in the achievement of their annual growth targets.

2.2.1 - Managing Urban Growth

Section 2.2.1 of the Niagara Region Official Plan contains policies pertaining to the management of urban growth. Generally, these policies direct growth to occur in a manner that supports the achievement of intensification targets, is compact and vibrant, is inclusive of a mix of land uses and housing forms, and efficiently utilizes existing services and transportation networks/services.

The applications conform with this policy direction through the provision of a mix of residential housing forms on urban, serviced land. The proposed development will assist the City in rounding out available lands with a logical development pattern that will contain vibrant housing forms and streetscapes.

Overall, the applications are considered to conform with the Niagara Region Official Plan and implement its growth management direction in an appropriate, efficient and context sensitive manner.

Policy 2.2.1.1 b) states that development in urban areas should support a compact built form, a vibrant public realm, and a mix of land uses to support the creation of complete communities. The proposed development exemplifies these principles by offering a variety of built forms, including compact built forms such as back-to-back townhouses that are compatible with the proposed and existing surrounding area, increasing the diversity in the range of residential housing types. The proposed development also includes the provision of public lands for park purposes in support of the creation of a complete community. The subject lands will be conveniently located near institutional, commercial, complementary recreational and mixed uses, thus enhancing accessibility. By contributing to the mix of land uses in the area and including parkland within the subdivision, the proposed development assists in the creation of a comprehensive and complete community.

Policy 2.2.1.1 c) states that development in urban areas should accommodate a diverse range and mix of housing types, unit sizes and densities to accommodate future and current market-based and affordable housing needs. The proposed development aligns with this policy by offering three types of dwelling units; single-detached, street townhouse and back-to-back townhouses under freehold tenureship. The proposed subdivision also includes a condominium block that will include medium density residential housing, though the typology and unit count has yet to be determined. These units will be under condominium tenureship, providing a greater variety in homeownership options. This integration of further housing options within the surrounding area improves and diversifies the availability of housing choices. It provides further

alternative options for individuals based on factors such as household size, income levels, and housing preferences, ensuring a more inclusive and adaptable housing environment.

Policy 2.2.1.1 e) states that development in the urban area should support built-forms, land use patterns and street configurations that minimize land consumption, and reduce the cost of municipal water and wastewater systems and services. The proposed subdivision represents a compact and efficient development that provides for the efficient use of land and infrastructure. The development will be supported by extending existing municipal infrastructure that is available via Quaker Road. The provision of additional housing units will help to optimize the efficient use of the existing municipal infrastructure.

Policy 2.2.1.1 f) states that development in the urban area should support opportunities for transit supportive development. The proposed development of the subject lands contributes to the accommodation of transit-supportive density which improves the feasibility of providing transit service in the future to the area. The proposed development is within an urban boundary area known as the Northwest Welland Secondary Plan area. The increased density in this area introduces opportunities to provide and/or improve transit routes and facilities within the Secondary Plan area to accommodate transit users more efficiently.

Policy 2.2.1.1. g) states that that development in urban areas should support opportunities for intensification, including infill development. This development consists of urban lands that are currently underutilized, surrounded mainly by other underutilized lands that are proposed for development, primarily residential uses, thus making for a practical use of existing land to intensify.

Policy 2.2.1.1 h) states that development in urban areas should support opportunities for the integration of gentle density, and a mix and range of housing options that considers the character of established neighbourhoods. The proposed development considers the character of the surrounding area and will provide for single-detached dwellings backing onto existing established single-detached dwellings with townhouse units being provided through the remainder of the site. The area is considered a developing area, and therefore the proposed residential uses are appropriate and compatible, accommodating for the projected growth in the area, while being in keeping with the surrounding land uses.

Policy 2.2.1.1 k) states that orderly development in accordance with availability and provision of infrastructure should be accommodated within the urban area. The subject lands are located adjacent to existing institutional uses and residential areas which have full municipal services. The proposed development represents the logical and orderly progression of development which optimizes the use and provision of infrastructure.

2.2.2 Strategic Intensification and Higher Densities

As noted, the subject lands are located within the Designated Greenfield Area. Per Policies

2.2.2.23 and 2.2.2.24 of the NOP, Designated Greenfield Areas shall achieve a minimum density of 50 people and jobs per hectare. Based on the proposed development, a minimum density of 56.494 people and jobs per hectare is achieved, as calculated in **Table 1**.

Table 1 – Greenfield Density Calculation						
People			Jobs			
Unit Type	Unit Count	Ratio (PPU) ¹	Total	Unit Count	Ratio (at home employment)	Total
Single-Detached Dwelling	19	2.929	55.651 people	19	5% of dwellings	.95 jobs
Street Townhouses	107	2.189	234.223 people			
Back-to-Back Townhouses	16	2.189	35.024 people	152	5% of dwellings	7.6 jobs
Multiple Unit	29	2.189	63.481 people			
Subtotal	388.379 people		8.55 jobs			
Total	396.929 people and jobs					
Land Area	7.026 ha (exclusive of the road widening)					
Greenfield Density	field Density 56.494 people and jobs per hectare					

^{*} Niagara Region Development Charges Background Study, Appendix A Schedules 5 & 9a (Watson & Associates Economists Ltd., May 30, 2022)

The minimum density target of 50 residents and jobs per hectare set out by the Region does not apply on a site by site basis, but collectively across Designated Greenfield Area lands on a municipal-wide basis, excluding areas constrained by environmental features, utility corridors, cemeteries and employment areas. Nonetheless, the proposed residential development meets and exceeds the minimum density target, and therefore conforms to the Policy.

The proposed development provides appropriate density for an area that is proposed for mixed uses, low and medium density residential. This density is provided by way of single-detached, street townhouse, and back-to-back townhouse freehold dwelling units, with an additional condominium block that provides greater density.

¹ Niagara Region Development Charges Background Study (2022), Schedule 3

Policy 2.2.2.25 of the Regional Plan directs that Designated Greenfield Areas will be planned as complete communities by:

- a. ensuring that development is sequential, orderly and contiguous with existing built- up areas;
- b. utilizing proactive planning tools in Section 6.1 and Section 6.2, as appropriate;
- c. ensuring infrastructure capacity is available; and
- d. supporting active transportation and encouraging the integration and sustained viability of public transit service.

The proposed development is within the Designated Greenfield Area, and will occur contiguous to the Built-up Area to the south and east. The lands to the north and west are within the Northwest Welland Secondary Plan, therefore are in a new growth area known as the Designated Greenfield Area. The proposed development on the subject lands is being planned comprehensively in order to provide transportation connections to the south and west. The proposed development is considered to be both sequential and orderly.

As the subject lands are within a Secondary Plan Area, Section 6.1 and 6.2 are addressed.

The Northwest Welland Stormwater Management Implementation Plan and Northwest Welland Secondary Plan Municipal Servicing Design Report identify the upgrades required to the existing Sanitary and Water Sewer System to achieve the proposed densities of the Secondary Plan. Nonetheless, infrastructure capacity is available, as detailed in the Functional Servicing Report prepared by Upper Canada Consultants. All-in-all, this development will utilize underutilized infrastructure within the area.

There are sidewalks proposed throughout the subdivision along one side of the public road network. The anticipated improvements for the Secondary Plan area include the construction of active transportation opportunities along Quaker Road. Together, this will significantly improve connectivity and the ability to increase the use of active transportation. Further, the density of the proposed development also supports the potential for public transit in area.

Overall the applications are considered to conform with the NOP and implement its growth management direction in an appropriate, efficient and context sensitive manner. The proposed development will assist the Region in the achievement of its Greenfield Density target and utilize underutilized lands and existing infrastructure within the Urban Boundary.

2.3 - HOUSING

The objectives of the policy direction under Section 2.3 of the NOP are to provide a mix of housing options to address current and future needs, to provide more affordable and attainable housing

options, and to plan to achieve affordable housing targets through land use and financial incentive tools.

2.3.1 – Provide a Mix of Housing Options

Policy 2.3.1.1 directs that a range and mix of densities, lot and unit sizes and housing types should be accommodated in the settlement area to meet housing needs at all stages of life.

The Northwest Welland Secondary Plan area will facilitate a range of low and medium density housing forms that include single-detached, semi-detached, townhouse and apartments dwelling units. The absence of high-density housing permissions is intentional and appropriate, as these development opportunities and forms are best directed to the City of Welland Regional Growth Area (Downtown Welland), intensification corridors and within the Built-up area.

The proposed Subdivision will provide single-detached, street townhouse and back-to-back townhouse units that range in size, contributing to the diversification of housing supply in Niagara. This variety of housing improves accessibility and affordability for both homeowners and renters. The proposed subdivision will also include a condominium block that will include further housing opportunities. Therefore, this development effectively addresses the provision of diverse housing options and meets the needs of individuals at various stages of life, aligning with the goals outlined in this policy.

2.3.3 - Tools to Achieve Affordable and Attainable Housing

The proposed development consists of two different types of townhouse dwelling units. This proposed housing will accommodate a range of household sizes and incomes, and increases the housing supply, which supports the development of affordable and attainable housing as provided in Policy 2.2.3.3.1 d).

CHAPTER 3 – SUSTAINABLE REGION

Chapter 3 of the Niagara Official Plan contains the policies pertaining to the natural environment hazards and natural resources. Specifically, these policies pertain to features shown on *Schedule C1 – Natural Environment System Overlay and Provincial Natural Heritage System* and *Schedule C2 – Natural Environment System – Individual Components and Features*.

Per Policy 3.1.30.4 of the 2022 Niagara Official Plan, "Where a secondary plan has been approved after July 1, 2022, those portions that are not subject to a draft approved plan of subdivision or plan of condominium shall be approved in accordance with the approved mapping and policies of the secondary plan."

The subject lands are within the Northwest Welland Secondary Plan area and the Plan indicates there are no Environmental Conservation or Environmental Protection areas however, there is a potential natural heritage corridor along a headwater drainage feature. As such, a Terms of Reference and Environmental Impact Study including a Headwater Drainage Feature analysis were prepared.

The EIS determined that the subject lands do not contain any natural heritage features though they are near other wetlands and woodlands located in the vicinity on adjacent properties. With regards to the potential natural heritage corridor the EIS evaluated a corridor between the woodlands approximately 200m to the west and a PSW approximately 850m east of the subject lands and determined that there is no functional or ecological exchange occurring along the proposed corridor and therefore the potential corridor is not required to support the natural heritage system and should be removed from the planning requirements. The proposed development will also pose no direct impacts to any of the identified natural heritage features in the vicinity of the subject lands, and due to the separation from these features, the potential for indirect impacts is considered minimal. With the implementation of the suggested mitigation measures, the proposed development will not pose any negative impacts on the nearby natural heritage features and associated functions.

CHAPTER 6 – VIBRANT REGION

6.1 - DISTRICT PLANS AND SECONDARY PLANS

Secondary Plans establish detailed policies and guidelines build on significant community consultation that directs development within a certain area. They are intended for proactively planning for growth which assists in achieving mixed-use, compact built form, providing a range and mix of housing options, protecting established neighbourhoods, encouraging transit-supportive development, supportive public service facilities, protecting and enhancing the natural environment, establishing direction to mitigate and adapt to climate change and support high quality public spaces.

The subject lands are located in the Northwest Welland Secondary Plan Area; a Secondary Plan was prepared for this new Designated Greenfield Area within the Urban Area Expansion Area, as this Plan area was larger than 15 hectares.

As per Section 6.1.4.7, secondary plan policies and schedules are to ensure there is diversity and a mix of land uses and built forms; high quality urban design and public realm; parks and open space; refinement and implementation of the Region's natural environmental system; adequate infrastructure including transit and active transportation; support of sustainable and resilient communities; and locations with public service facilities.

The proposed development contributes to Secondary Plan policies as the proposal increases density and provides different built forms, connectivity through sidewalks and street connections, and there is adequate infrastructure in the area that is planned to be improved through the build-out of the Secondary Plan area.

The proposed subdivision plan meets and exceeds the greenfield density target of 50 people and jobs per hectare, and increases the housing supply with built forms such as single detached units and two varieties of townhouse units, as well as a condominium block with differing tenureship, contributing to providing more housing choices aimed at more attainable housing.

6.2 – URBAN DESIGN

As per Section 6.2, Urban Design has been taken into consideration to ensure the dwelling units are both attractive and functional, and incorporate with the surrounding neighbourhoods in order to create a complete community. These dwellings will contribute to the creation of a liveable and vibrant urban area, that is safe and offers high quality streetscapes and public spaces. The objective is to strengthen community identity and diversity and the integration of this development will do just that. The values of Urban Design have been taken into great consideration with this development, as it illustrates how the built form, streetscape and public realm can achieve the desired level of quality required.

The lands are provided with municipal services and will include a public park and sidewalks on one side of the internal road network. It is anticipated that bicycle lanes/sidewalks will be constructed along Quaker Road, and that transit will extend through the Secondary Plan Area in the future as the area builds out.

The proposed subdivision aligns with the stipulations outlined by emphasizing a comprehensive approach to urban planning and design within a Secondary Plan Area. By incorporating a mix in built forms, prioritizing high-quality urban design and public realm enhancements, the development strives to contribute to fostering sustainable and resilient communities. Through thoughtful consideration of urban design principles, the proposed dwellings not only fulfill functional needs but also contributes to the creation of a cohesive and vibrant urban environment. Ultimately, with provisions for a mix in built forms, provision of parkland, connectivity with existing and proposed subdivisions and pedestrian infrastructure, the development emphasizes its commitment to enhancing community well-being and connectivity.

CITY OF WELLAND OFFICIAL PLAN (2011)

The City of Welland Official Plan (2011) provides a 20-year land use vision for the community and is supported by a set of broad strategic community directions. The Official Plan helps the community achieve its long-term vision by implementing a range of local, regional and provincial policies, plans and strategies.

The approval of OPA 29, being the Northwest Welland Secondary Plan provides site-specific and general policy direction on the subject lands. An analysis of applicable general Official Plan policies and those specific to the NWSP Area are included within this portion of the Planning Justification Report.

The subject lands are currently designated Low-Density Greenfield Residential and Open Space and Recreation.

It is proposed that the land uses be amended to Open Space and Recreation for the parkland block and stormwater management block, Medium Density Residential – Special Policy Area for the condominium block, and Low-Density Greenfield Residential – Special Policy Area for the remainder of the site. The in-effect Official Plan designation is shown in **Figure 5**, and the Official Plan Amendment Schedule 'A' is shown on **Figure 6**.

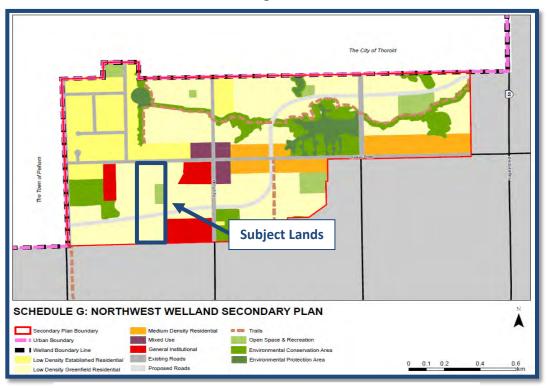

Figure 5 - Official Plan Schedule 'G' - Northwest Welland Secondary Plan

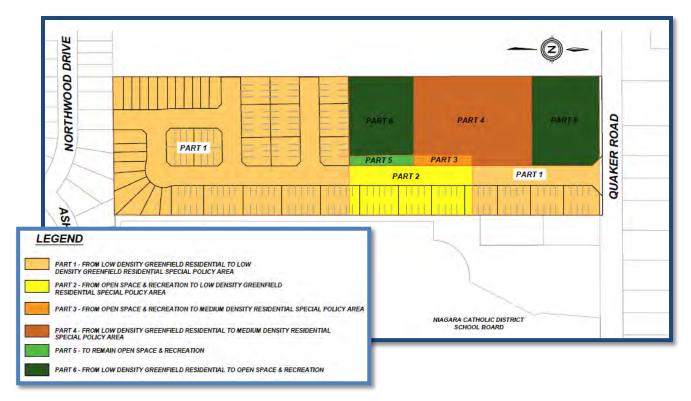

Figure 6 - Official Plan Amendment Schedule 'A'

SECTION 2 COMMUNITY STRATEGIC DIRECTIONS

The City's strategic directions are contained within Section 2 of the Plan and include that the City of Welland is desired to be:

- A Leadership Community
- A Complete Community
- An Economic Gateway
- A Sustainable City
- A Safe, Healthy and Accessible Community
- A Proud and Attractive City
- A Good Neighbour

The proposed development will contribute to the achievement of these community directions, specifically those related to being a Complete Community.

Complete Community (Section 2.3)

Complete communities meet the daily needs of people throughout their lifetime by providing convenient access to an appropriate mix of employment, community services, and a full range of housing types. Convenient access to public transportation and options for safe, non-motorized

travel are also important components of complete communities. Together, these elements provide a lifetime of opportunities for living, working, wellness, education, entertainment and recreation.

The proposed development is a part of the Northwest Welland Secondary Plan Area that is anticipated to be constructed as a comprehensive complete community. As proposed, a minimum of one hundred and seventy-one (171) new residential units will be included into the area. The condominium block (Block 43) unit count has yet to be confirmed, though it will yield a minimum of twenty-nine units (29) units, as this is the minimum density threshold for the Medium Density Residential designation, suggesting that this unit count may be exceeded.

These new housing opportunities will provide varying dwelling forms that include single-detached units, street townhouse units and back-to-back townhouse units. The condominium block may include a greater variety of unit types including apartment dwellings, block townhouses, back-to-back townhouses and/or stacked townhouses.

The proposed development will increase the available housing supply and contribute to a full range of housing forms, densities and tenures. The proposed increase in housing density and diversity will contribute to greater housing attainability and better affordability within the market. To add, the proposed development and area will benefit from a new municipal park consistent with the Northwest Welland Secondary Plan. Therefore, the approval of the submitted applications can assist the municipality in the attainment of complete community goals and objectives.

SECTION 3 GROWTH MANAGEMENT

Section 3 of the City's Official Plan contains policy direction related to growth and development in the community.

As noted in Section 3.1, "The foundation of the City's growth management strategy is to direct all urban growth to lands within the designated Urban Area Boundary. Growth and development within the Urban Area Boundary will be on land serviced with municipal water and sanitary wastewater services."

The applications conform with this policy direction by facilitating residential development on lands within the Welland Urban Area Boundary. The subject lands will be serviced by existing urban infrastructure including municipal watermain and sanitary and storm sewers that are designed in accordance with the recommendations of the Northwest Welland Stormwater Management Implementation Plan and Northwest Welland Secondary Plan Municipal Servicing Design Report.

Planning Objectives (Section 3.2)

The Official Plan contains nine growth objectives, which include:

- i. To direct urban growth to lands located within the designated Urban Area.
- ii. To preserve prime agricultural lands and direct rural growth to existing developed area in the vicinity of Cooks Mills.
- iii. To protect stable neighbourhoods by directing more dense development to the Downtown and strategically located intensification areas within Welland's Built-Up Area.
- iv. To encourage the redevelopment of brownfield areas.
- v. To prevent urban development in inappropriate areas, thus contributing to the conservation of resources, such as provincially significant wetlands, aggregate resource areas, cultural heritage resource areas, prime agricultural lands and the linked natural heritage system.
- vi. To build compact, mixed-use, transit supportive, pedestrian friendly areas within the Built-Up Area and Greenfield Areas.
- vii. To provide a framework for transforming Welland into a complete community.
- viii. To ensure the availability of a sufficient supply of designated employment and residential land to meet the City's projected long-term growth.
- ix. To prohibit the establishment of new settlement areas.

The proposed development will satisfy and achieve several objectives set out in Section 3.2 of the Official Plan. The subject lands are located within the Welland Urban Area and are within a Secondary Plan Area. Further, the lands within the Plan area are designated for low- and medium-density residential uses development. The subject lands are specifically permitted for residential development and open space. The subject applications direct compact, pedestrian friendly, transit supportive density and growth within the Urban Area Boundary. The proposed development will contribute to transforming Welland into a complete community, as this residential development will be surrounded by other residential developments, institutional uses, commercial uses and recreational uses. The proposed development will contribute to the City's projected long-term growth in an area that is planned for growth and development.

Growth Forecast (Section 3.3)

The City of Welland Official Plan was approved in 2011 and continues to contain previous population and housing forecasts. These projections will be updated through a future comprehensive update to the Official Plan to ensure conformity with the recently approved Niagara Official Plan.

As set out in Section 2.1 of the Niagara Official Plan, the City of Welland has a forecasted population of 83,000 people and 28,790 jobs by the year 2051.

As set out in Section 3.3.1 of the Official Plan, the forecasted population for Welland in the year 2031 is 69,300 persons. To achieve this target, 27,590 total housing units are required to be constructed within the City by 2031. Of these units that are projected to be constructed, 3,210 of them are to be medium density dwelling forms.

To accommodate this growth, a mix of dwelling forms are required throughout the City. The proposed development includes a variety of built forms, including single-detached dwellings, street townhouse dwellings, and back-to-back townhouse dwellings. Further, the proposed subdivision includes a condominium block that will be subject to a future pre-consultation meeting and planning applications. This condominium block is 1.130 hectares and will provide medium density housing under condominium tenureship. The entirety of the Northwest Welland Secondary Plan is to include a variety of dwelling-built forms that will be crucial to the City's ability to meet and accommodate prospective growth values.

City Structure (Section 3.4)

The subject lands are located within the Urban Area boundary and the Designated Greenfield Area. Accordingly, the applications must conform with the Urban Area and Greenfield Development policies of the Official Plan.

Section 3.4.2 Urban Area

Section 3.4.2 of the Official Plan contains policy direction for the Welland Urban Area, as well as lands within the Built Boundary and Greenfield Areas.

The Welland Urban Area is a location of development certainty for private investment that is intended to be served with municipal services and roads. The Urban Area constitutes the geographic area where growth is forecasted to occur to the planning horizon.

The subject lands are located within the Welland Urban Area and Designated Greenfield Area. As the submitted amendments seek permission to facilitate residential development on lands that are supported by full municipal services, and therefore the applications are considered to conform to the Urban Area policies of the City's Official Plan.

Section 3.4.5 Greenfield Development

As per Section 3.4.5 of the Official Plan, Greenfield Areas are located outside of the City's Built Boundary, but within the Urban Boundary. Greenfield lands provide the City with an opportunity

to comprehensively build compact and integrated neighbourhoods. The growth objectives associated with Greenfield developments are to establish denser, more compact, mixed-use and transit supportive neighbourhoods as that allow for the efficient use of land, infrastructure and public service facilities and support the City's strategic direction to build a complete community.

Designated Greenfield Areas, such as the subject lands are to be planned to support the achievement of development densities that meet or exceed 50 residents and jobs combined per gross hectare. The proposed development meets and exceeds the minimum Designated Greenfield Area density target, with 56.386 people and jobs per hectare.

The proposed development with varying housing-built forms adheres to the density target of the Greenfield Area as noted above and responds directly to the need for more housing within the City to support the projected population.

SECTION 4 URBAN AREA LAND USE POLICIES

Section 4 of the City of Welland Official Plan contains the general policy framework for development within the Welland Urban Area.

Housing and Residential (Section 4.2)

Section 4.2.1 Planning Objectives

Generally, the planning objectives for residential development and housing found in Section 4.2.1 of the Official Plan seek to establish:

- An appropriation distribution of residential areas;
- Compact, efficient and logical patterns of development;
- An appropriate range and mix of land uses;
- Housing that is planned and developed to meet the needs of citizens at all levels of income; and
- Convenient access to transit, shopping, open spaces, recreation and urban amenities.

The submitted applications conform with this policy direction by proposing residential development that is contiguous to existing and future residential uses, has access to full municipal services, efficiently utilizes underutilized urban lands and is located adjacent an arterial roadway.

The proposed residential development includes an appropriate range of built forms, that include single-detached, street townhouse and back-to-back townhouse dwellings. Not only do these different built forms adhere to different demographics, they also provide a range in price which

can result in greater housing equity and attainability. The inclusion of dwelling types such as back-to-back townhouses fill in the 'missing middle' of housing.

The strategic layout of the proposed subdivision has the single-detached dwellings at the south end of the site directly adjacent to the existing low-density subdivision. The park block is central to the site, adjacent to the condominium block, and the condominium block being closer to Quaker Road adjacent to the stormwater management facility.

As the proposed development is within the Greenfield Area, the area is developing and greater services will be provided as the area is built out with future mixed uses being proposed at the intersection of Quaker and Rice Roads. The subject lands are also in close proximity to necessities and urban amenities, schools, shopping and open spaces.

Section 4.2.2 Land Use Policies

Residentially designated lands are integral to the achievement of Regional and municipal growth targets and their development potential should be maximized to limit the need for urban expansion or conversion of employment lands.

The residential portion of the subject lands are proposed to remain Low Density Greenfield Residential as per the Northwest Welland Secondary Plan Area, though amendments are proposed to the Official Plan, permitting Multiple Dwellings and higher density (maximum 60 units/hectare) within the Low-Density Greenfield Residential designation. Condominium Block 45 is proposed to be designated Medium Density Residential – Special Policy Area to permit an increased density of a maximum of 125 units/hectare. It is noted that the requested low and medium density thresholds are consistent with the thresholds established in the draft Official Plan update for the City of Welland. The Parkland Block 44 and Stormwater Management Facility Block 45 are proposed as Open Space & Recreation.

Section 4.2.2.2 – Low Density Residential

Section 4.2.2.2A indicates that the Low-Density Residential designation is to provide housing at a density range of 15 to 24 dwelling units per net hectare. This policy is proposed to be amended, permitting a density of up to 60 dwelling units per net hectare.

As per Section 4.2.2.2B, permitted uses for the Low-Density Residential designation include single-detached, semi-detached, triplexes, townhouses and duplex housing units. It is further proposed that this policy be amended to permit multiple dwellings as well which would include the proposed back-to-back townhouse units. The proposed development includes sixteen (16) back-to-back townhouses which are defined as multiple dwellings.

The City of Welland has put forth a draft Official Plan which suggests increases in the maximum density per residential land use, and a greater variety of built forms. As such, these minor amendments maintain the intent of the Low-Density Residential designation and are in alignment with the proposed draft Official Plan.

The proposed built forms include single-detached, street townhouse, and back-to-back townhouse dwellings. The single-detached and street townhouse dwellings will be two-storeys in height, with the back-to-back townhouse dwellings being three-storeys in height. These dwellings are considered to be low-rise and will not cause issues with casting of shadows, obstruction of views or privacy for any adjacent lots.

All dwelling units will be provided with covered entrances or front porches and attached garages. The dwellings have been designed with the garages set back from the front porches, in order to provide a more attractive streetscape, and greater interaction amongst the public and private realm. The subdivision will include dwellings with a variety of facades and cladding, providing interest and differentiation. The proposed single-detached dwellings will back onto existing established single-detached dwellings, providing for a suitable transition with the surrounding existing land uses and contribute to housing choice and options within the development.

All-in-all the proposed residential uses within the subdivision are appropriate for the Low-Density Residential land use.

Section 4.2.2.3 – Medium Density Residential

Block 45 is proposed to be designated as Medium Density Residential – Special Policy Area as it is anticipated that this condominium block will provide a compact development at a higher density, with a lower price point than the remainder of the subdivision.

As per section 4.2.2.3.A, the Medium Density Residential densigation permits residential development within a density range of 25 to 60 dwelling units per net hectare of land. This policy is proposed to be amended to permit a maximum density of 125 dwelling units per net hectare. Section 4.2.2.3.B is proposed to be amended to include multiple dwellings and mid-rise apartments as permitted uses, as the permitted uses include triplex, four-plex, townhouse, stacked townhouse, and low-rise apartment housing. Lastly, Section 4.2.2.3.C is proposed to be amended to accommodate mid-rise dwellings (4-8 storeys) that do not cause significant issues with casting of shadows.

The condominium block will have a minimum of twenty-nine (29) units for demonstration purposes, as 29 units suggests a density of 26 units per hectare. The unit types may include

apartment dwellings, block townhouses and/or multiple dwellings including stacked townhouses or back-to-back townhouses.

The proposed amendments directly align with the draft local Official Plan, as well as the objectives of the Northwest Welland Secondary Plan, and provide the greatest flexibility for future residential development. Further, 6-storey apartment builds are permitted for the Residential Medium Density zoning in Zoning By-law 2017-117, therefore, amending these policies would be more in alignment with the Zoning By-law.

This Medium Density Residential block has been strategically located directly adjacent to the Park Block and near Quaker Road. As the unit types have yet to be determined, they will be further detailed through future planning applications, though they will be in keeping with the Medium Density Residential Policies.

Section 4.2.3 Additional Policies

Design policies for new neighborhoods are to be planned to support the Region's density target of combined 50 residents and jobs per gross hectare on designated Greenfield lands as per Section 4.2.3.2. The proposed development meets and exceeds the Region's density target, with a Greenfield Density of a minimum of 56.464 people and jobs per hectare.

New neighbourhoods are to have clearly defined character with built form and landscaping which meet or exceeds the standards established by other development in the Region. They are to be visually interesting by discouraging repetitive built form and incorporating a variety of building materials. The proposed development will integrate and appropriately transition with the established residential area to the south and the planned residential and mixed-use development within the Northwest Welland Secondary Plan Area. A variety of building treatments will be used to provide variety and interest to the building design.

Below in **Figure 7**, are three single-detached dwelling designs. As you can see, all dwellings are two-storeys, with garages and covered porches. These houses are considered to be more transitional and modern, that utilize different building materials, have different roof pitches, and windows. They provide variety and visual interest, while maintaining attractive similarities.

Figure 7 – Single-detached Dwelling Elevation

Figure 8 and **9** are rendering of two street townhouse designs that fit on the same size block, but are varying in design; one being traditional and the other being modern. Each townhouse block utilizes a variety of building materials to provide interest and discourage a repetitive building design, though being complimentary to one another providing an attractive streetscape. In each case, the front porch and entrance is prominent being emphasized with proticos and the visual impact of the garage is minimized by recessing the garage. To add, doubling up on the driveways allows for adequate space for landscaping and boulevard tree plantings.

Figure 8 – Street Townhouse Block Elevation – Smaller Style

Figure 9 – Street Townhouse Block Elevation – Smaller Style

Figure 10 and **11** below provide further examples of the street townhouses that will be considered for the proposed development, that are somewhat larger than the units shown in Figures 8 and 9. These designs also vary with respect to design, utilizing varying building materials, combined with articulation of the plane of the front façade to provide interest and an attractive streetscape. Each also emphasizes the front porch and recesses the garage beyond the front wall of the building minimizing the visual impact of the garage on the streetscape.

Figure 10 – Street Townhouse Block Elevation – Larger Style

Figure 11 – Street Townhouse Block Elevation – Larger Style

Lastly, the back-to-back townhouse units are illustrated below in **Figure 12**, and they also exhibit traditional design elements through pitched roofs, gables and window placement. The utilization of a variety of building materials and colours provides interest and contributes positively to the streetscape. To add, the front façade has an articulating front plane that helps define each unit and the units have recessed balconies for private outdoor amenity space.

Figure 12 – Back-to-Back Townhouse Block Elevation

Overall, the proposed dwellings have been intentionally designed to provide differentiation and interest, while being complimentary to each other. Similar principles are maintained throughout, including the utilization of a variety of building materials and colours, covered entrances or front porches, attached garages, and adequate space for landscaping and boulevard trees. Thoughtful design principles have been included in the preparation of this subdivision which provide for attractive housing that overall increases the aesthetics of the area.

SECTION 6 CITY-WIDE LAND USE POLICIES

Parks, Open Space and Recreation (Section 6.2)

Policy 6.2.3.1 A states that "In accordance with the *Planning Act*, as a condition of development approval, the City of Welland may require the applicant to dedicate up to 5% of the gross area for the provision of public open space, other than roads, in residential developments, and up to 2% for commercial or industrial developments".

The City of Welland Parks, Recreation and Culture Master Plan was approved in 2019 and provides strategic, long term direction to the City on the provision of recreational lands and opportunities within the community, among other items.

The establishment of new parkland is expected due to the overall scale of the Northwest Welland Secondary Plan and the need to provide adequate community recreational opportunities. As such, the proposed draft plan of subdivision contemplates the dedication of 0.576 hectares of land for parkland purposes.

Transportation (Section 6.4)

Generally, the City of Welland Official Plan promotes a multi-modal approach to transportation within the municipality. This includes an emphasis on growing public transit and providing pedestrian and cycling infrastructure and roadways that meet the needs of current and future residents.

The subject lands will be developed inclusive of pedestrian oriented amenities including sidewalks and access to and from the public realm. The proposed development density is deemed to be transit supportive and should serve as justification for the future provision of transit service into this portion of the municipality.

The urbanization of Rice Road and Quaker Road are to be completed through the Secondary Plan build out, which will include both sidewalks and bicycle lanes on Quaker Road and a multi-use trail on Rice Road.

Infrastructure and Utilities (Section 6.5)

Consistent and in conformity with Provincial and Regional policy direction and the City of Welland Official Plan, all new development within the Urban Area is to be connected to the water and sanitary system.

The proposed development will extend, and be connected to existing municipal water and wastewater services, and the proposed development will assist in the optimization of efficiently utilizing this infrastructure. As confirmed by the Functional Servicing Report prepared by Upper Canada Consultants, the existing infrastructure can adequately accommodate the proposed development.

NORTHWEST WELLAND SECONDARY PLAN POLICIES

The Northwest Welland Secondary Plan is intended to direct development in Northwest Welland to evolve into a complete community that will accommodate future growth and development that respects the existing built form and character of the area and natural environment. the Northwest Welland Secondary Plan Area covers approximately 190 hectares of land along Quaker Road and is generally bound by the Town of Pelham and City of Thorold to the north, the Niagara College Welland Campus to the south, the rear lot lines of properties abutting Niagara Street to the east, and Line Avenue and Clare Avenue to the west.

New low-density residential areas will develop as extensions of existing established neighbourhoods within the community, and new medium density residential growth will serve to intensify Quaker Road to the east of Rice Road, providing for a more walkable, transit supportive community close to parks, trails, and schools. The proposed subdivision exemplifies the intent of the Secondary Plan, as the single-detached dwellings are adjacent to existing single-detached dwellings, and built forms with greater density are in the remainder of the site towards Quaker Road.

The objectives of the plan area as follows:

- To protect and enhance natural heritage features, areas, and corridors of Northwest Welland within the City's broader linked natural heritage system
- To promote healthy and active living for all ages and abilities by providing active transportation options and development a continuous and connected open space system, a safe and walkable pedestrian realm, and a trail system that links the community to destinations such as natural areas, parks, schools, stores, and recreation areas

- To create a unique and inclusive community for residents by providing for a diverse range
 of housing types and a variety of uses located within the area
- To maintain the low-density residential character of existing neighbourhoods, while development a new community that is compact, connected, walkable and diverse
- To reduce traffic congestion by providing a balanced road network for local residents, businesses, students, and visitors supportive of the public transit network
- To conserve, protect and integrate built and cultural heritage elements as per Section 6.6 of the Plan
- To implement sustainable community design initiatives that ensure conservation of water resources and adaptation to climate change

Land Use Structure (Section 7.3.1.6)

The subject lands are proposed to be designated Low Density Greenfield Residential – Special Policy Area, Medium Density Residential and Open Space and Recreation.

It is proposed that the single-detached dwellings, street townhouse dwellings and back-to-back townhouse dwellings be designated Low Density Greenfield Residential – Special Policy Area. The net density is 45.82 units per hectare, and a maximum of 60 units per net hectare is requested.

Block 43 is intended to be a future condominium site and is proposed to be designated Medium Density Residential – Special Policy Area, permitting a maximum density of 125 units per net hectare.

Blocks 44 and 45 are proposed to be designated Open Space and Recreation, as they are to be a municipal park and stormwater management facility.

Overall, residentially designated lands within the NWSP are integral to the achievement of Regional and municipal growth targets. The subject development achieves this by making efficient use of the development lands, adhering to the objectives of the Secondary Plan, and achieving greater number of units and densities than would be provided otherwise.

Low Density Greenfield Residential

The intention of the Low-Density Greenfield Residential area is to recognize future low-density residential development areas on vacant designated lands. The Low-Density Greenfield Residential designation is in alignment with the Low-Density Residential designation of the Official Plan which has been described above under Section 4.2.2.2 Low Density Residential.

As noted, it is requested that the subject lands be included as a Special Policy Area as amendments are proposed for Section 4.2.2.2A and 4.2.2.2B.

Though the subject lands exceed the low-density range of Section 4.2.2.2A, they maintain the objectives and intent of the low-density designation. The permitted uses for this designation are to be in accordance with Section 4.2.2.2B of the Official Plan as described above, however, it is requested that Multiple Dwellings be permitted within this designation as there are sixteen (16) back-to-back townhouse dwellings within the proposed subdivision.

The proposed dwellings will be in keeping with both Welland's City-wide Urban Design Guidelines and the Northwest Welland Urban Design Guidelines. The built form was thoroughly described above. All dwellings are proposed to be street related to promote a positive interaction between the private and public realm. All dwellings will have consistent setback with the intention of providing a harmonious relationship to the street, overall increasing the aesthetic of the streetscape. The proposed dwellings are intentionally designed to ensure adequate space for front yard landscaping and boulevard trees, with sidewalks along the streets.

Medium Density Residential

The intention of the Medium Density Residential designation is to provide residential development at increased densities to support walkability, transit and active transportation, as well as the viability of the future mixed-use node located at Quaker Road and Rice Road.

The Medium Density Residential policies are generally in alignment with Official Plan Section 4.2.2.3, though as noted above, it is requested that 4.2.2.3A, 4.2.2.3B and 4.2.2.3C be amended to increase the maximum density to 125 units per net hectare, and permit multiple dwellings and mid-rise (4-8 storey) apartments to provide greater flexibility.

With respect to the scale of development, the highest densities within this designation are encouraged to be developed adjacent to the Mixed-Use Designation area at Quaker Road and Rice Road. The proposed medium density block (Block 43) is just southwest of lands designated as mixed-use at the corner of Rice Road and Quaker Road. As such, this is an appropriate location for Medium Density Residential as they are considered compatible with the surrounding uses.

The proposed condominium block (Block 43) will reflect the design and built form direction of the Welland Urban Design Guidelines and the Northwest Welland Urban Design Guidelines, providing appropriate transitions in height, densities and scale adjacent to the remainder of the subdivision that is proposed to remain Low Density Greenfield Residential. The Medium Density Block is adjacent to the parkland block and stormwater management facility block, with street townhouses across on the east side of Street 'A'.

Parks, Open Space and Recreation

Within Northwest Welland, lands designated as Parks, Open Space and Recreation are to be developed and maintained as Neighbourhood Parks, which are to facilitate the immediate recreation needs of a neighbourhood within walking distance of the area being served. The proposed subdivision contemplates the creation of a 0.576-hectare park block to be dedicated to the City of Welland. The park will serve the proposed subdivision and the surrounding area to support the recreational needs of the broader community.

Sustainability

The proposed development includes sidewalks throughout the subdivision that will connect to future sidewalks along Quaker Road and beyond. Therefore, the proposed Subdivision is designed to support walking, cycling, and transit as preferred modes of transportation, in order to reduce traffic and encourage active and sustainable lifestyles for residents. Native trees will also be planted in the front yards of the proposed dwelling units. Appropriate stormwater management techniques will be employed to ensure the ephemeral hydrological function of the headwater drainage features are maintained that sustain downstream off-site features.

Transportation

A Transportation Impact Analysis was prepared for the entirety of the Northwest Welland Secondary Plan Area. Due to the state of the existing road network in this area, there are many opportunities for improvements for both active transportation and traffic. Improvements are anticipated with respect to capacity, active transportation and transit particularly for Quaker and Rice Roads. Further analysis was not required for the proposed development.

Infrastructure and Utilities

An initial Functional Servicing Report was completed for the entirety of the NWSP for proposed conceptual water, sanitary, and storm servicing. These analyses were used to develop general recommendations for municipal water, sanitary, and storm servicing requirements in the Secondary Area. A further Functional Servicing Report has been prepared for the subject lands. This Report confirmed that there is adequate infrastructure for this development, as the existing municipal watermain system is expected to have adequate capacity to provide both domestic and fire protection water supply and the receiving 600mm diameter Regional sanitary sewer on Quaker Road, the Towpath SPS and associated forcemain, and Welland WWTP are expected to have adequate capacity for the lands upon full build-out of the NWSP Area. The stormwater management facility will provide adequate quality, quantity and erosion controls.

Environmental Conservation Area

The EIS determined that the subject lands do not contain any natural heritage features and as such there are no lands designated Environmental Conservation Area on the subject lands, though there are other wetlands and woodlands located in the vicinity on adjacent properties.

A conceptual potential natural heritage corridor is mapped as traversing through the property on Appendix 1-Map 4, however. With regards to the potential natural heritage corridor the EIS indicated that there is no information available as to how the potential corridor was determined and it is believed to have been identified along a mapped watercourse between the woodlands approximately 200m to the west and a PSW approximately 850m east of the subject lands. Based on the results of field investigations and review of aerial imagery there is no evidence that a watercourse is in this location rather the area is ploughed through along its entire length and there is no defined bed and banks and there is no continuous feature that would provide safe wildlife passage opportunities, there is virtually no natural vegetation as the lands are in agricultural production and woodland and PSW features are connected with other linkages. Therefore, the EIS determined that there is no functional or ecological exchange occurring along the proposed potential corridor and therefore the potential corridor is not required to support the natural heritage system and should be removed from the planning requirements.

The EIS concluded that the proposed development will also pose no direct impacts to any of the identified natural heritage features in the vicinity of the subject lands, and due to the separation from these features, the potential for indirect impacts is considered minimal. With the implementation of the suggested mitigation measures, the proposed development will not pose any negative impacts on the nearby natural heritage features and associated functions.

CITY OF WELLAND ZONING BY-LAW (By-Law 2017-117)

The Zoning of the lands within the NWSP Area were not amended concurrently with Official Plan Amendment 24 or 29. The purpose of the Zoning By-law Amendment is to align the proposed zoning with the proposed designation. As shown in **Figure 13**, the subject lands are zoned Agricultural.

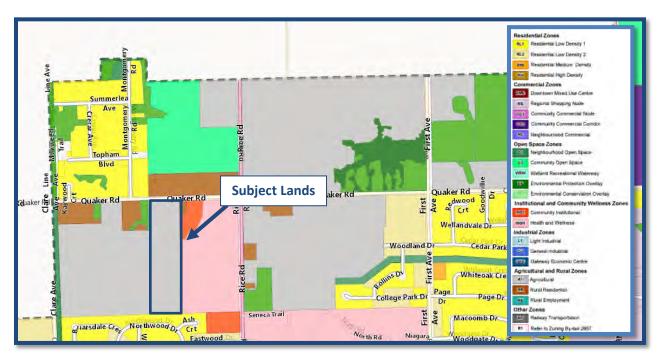

Figure 13 - In-effect Zoning within NWSP Area

To establish conformity with the Northwest Welland Secondary Plan and the proposed Official Plan designation, an amendment to the current zoning is proposed. **Figure 14** illustrates the proposed Zoning By-law Amendment, proposing to zone the lands site-specific Residential Low Density 2 (RL2-XX), site-specific Medium Density Residential (RM-XX) and Neighbourhood Open Space (O1). These designations are tailored to the subject lands and provide alignment for the implementation of the Secondary Plan policies.

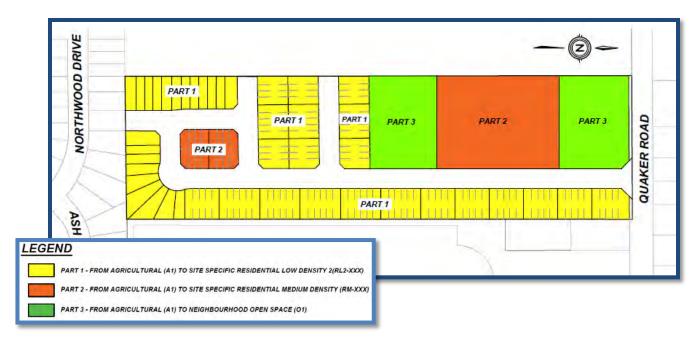

Figure 14 - Zoning By-law Amendment Schedule 'A'

Residential Low-Density 2 Zone (RL2-XX)

The Residential Low-Density of the Northwest Welland Secondary Plan is intended to be developed as extensions of existing established neighbourhoods within the community. The majority of the subject lands are planned to maintain the Low-Density Greenfield Residential designation and the requested zoning amendment will align the zoning with the land use designation. The subject lands are an extension of the low-density subdivision to the south, and the proposed subdivision will have single-detached dwellings adjacent to the established single-detached dwellings, incorporating a variety of built forms throughout the development along to Quaker Road. Site-specific provisions are requested for the Residential Low-Density 2 Zone and are shown in **Table 2** below.

Residential Medium-Density Zone (RM-XX)

The Residential Medium-Density Zone is intended to pertain to residential lands that are adjacent to the existing primary road network including Rice Road, Quaker Road, Clare Avenue and First Avenue. Given the proximity to Quaker Road, which is a higher-order roadway, the proposed Condominium Block (Block 43) is ideal for medium density development as the location of this block within the proposed subdivision has desirable access to servicing and has greater opportunities for higher density development and high-quality urban design. Block 43 and 44 are also intended to be zoned RM-XX. Permitted residential land uses within this Zone include single-detached, semi-detached, townhouse-unit, townhouse and apartment dwellings. As it has yet to

be determined what form of medium density residential housing will be constructed within the condominium block, several permissions for different built forms are requested to provide flexibility for future development.

As site-specific provisions are requested for the back-to-back townhouses (multiple dwellings) and the future condominium block, **Table 3** below illustrates these requests.

Neighbourhood Open Space Zone (O1)

Parkland within the Northwest Welland Secondary Plan are to be developed and maintained as Neighbourhood Parks, which shall serve the immediate recreation needs of a neighbourhood within walking distance of the area being served. The Neighbourhood Open Space Zone permits parks, trails and passive recreational uses that are meant to serve the surrounding community. With this, the proposed parkland is proposed to be zoned Neighbourhood Open Space Zone.

The stormwater management facility is also to be included in this zone.

Section 5: General Provisions

Encroachments: Permitted Yard, Setback and Height Encroachments Section 5.10.5.a) & e)

Proposed

Open or roofed porches and stairs may project 1.5 metres into any required front or exterior side yard and 3.0 metres into any rear yard, provided the structure is not higher than 1.5 metres from grade.

Decks may project a maximum of 3.75 metres into the required rear yard, provided said deck is not higher than 2.4 metres above grade.

Section 6: Parking and Loading Regulations	
Parking Space Dimension Section 6.1.6.b)	Proposed
Where a parking space is located abutting or near a wall, column or other similar surface that obstructs the opening of the doors of the parked vehicle or limits access to a parking space, the minimum width of the parking space shall be increased by 0.3 metres for each side that is obstructed	N/A
Required Parking Table 6.4.1 & Table 6.7.1	Proposed
Required Parking (Block Townhouse - 1 space per unit)	No Change
Required Parking (Apartment Dwelling, Multiple Dwellings (Stacked Townhouse, Back-to-Back Townhouse) - 1 space per unit, except where a dwelling unit is 50m² in gross floor area or less, in which case, parking shall be provided at a rate of 0.3 spaces for each such unit and no visitor parking is required	No Change
Required Bicycle Parking (Apartment Dwelling, Multiple Dwelling, Retirement Home – 0.25 spaces per dwelling unit)	No Change – Apartment N/A – Multiple Dwelling
Multiple Dwellings and Apartments Section 6.9.3	
On a lot containing a multiple dwelling or apartment dwelling: a) With the exception of any visitor parking required by Subsection 6.4 – Table 6.4.1 required parking for apartment dwellings shall not be located between the façade and front lot line. In no case shall any parking be located within 3.0 metres of a street line.	a) 1.5 metres of a street line
b) Visitor parking may be permitted between the façade and a street provided that no more than 50% of the front yard shall be used for visitor parking and access to such parking.	b) No Change

PLANNING POSITION

On behalf of Metro-Mountainview Developments Inc., Upper Canada Consultants has submitted concurrent applications to the City of Welland for an Official Plan Amendment, Zoning By-law Amendment, and Draft Plan of Subdivision for lands known as 575 Quaker Road. The applications have been submitted to facilitate the development of the lands to create nineteen (19) single-detached dwellings, one hundred and seven (107) street townhouse dwellings and sixteen (16) back-to-back townhouse dwellings, yielding a total of one hundred and forty-two (142) dwelling units. The subdivision also proposes a park block, stormwater management block and condominium block that will yield a minimum of twenty-nine (29) dwelling units. The condominium block is subject to a future pre-consultation meeting and subsequent planning application.

The subject lands are located within the Welland Settlement Area and the Designated Greenfield Area. The lands are within the Northwest Welland Secondary Plan Area, and proposed to be designated Low Density Greenfield Residential – Special Policy Area, Medium Density Residential – Special Policy Area and Open Space and Recreation. To add, the lands are correspondingly proposed to be zoned Site-Specific Residential Low Density 2 (RL2-XX) Zone, Site-Specific Medium Density Residential (RM-XX) Zone and Neighbourhood Open Space (O1) Zone.

The proposed development supports the sustainable land use patterns outlined in Provincial Land use documents in achieving compact land uses that help to optimize the efficient use of existing infrastructure. It balances the accommodation of prescribed growth targets and respects the character of the surroundings, improves house choices, and is an efficient use of land.

Based on the analysis of the Applications, preliminary Plans and Draft Amendments, it has been demonstrated that the applications:

- Have regard for, and satisfy the relevant sections of Section 2 the *Planning Act*;
- Are consistent with the 2024 Provincial Planning Statement;
- Are in conformity with the 2022 Niagara Official Plan;
- Are in conformity with the City of Welland Official Plan.

It is our opinion that the applications will facilitate appropriate forms of development that will contribute to the achievement of community goals and additional housing supply and forms. The applications are considered to be in the public interest and represent good planning.

Pre-consultation Meeting Form

City of Welland

Region of Niagara Niagara Peninsula Conservation Authority

Persons intending to make an application for a proposed development are required to consult with planning staff prior to submitting an application. A pre-consultation meeting will identify what is required to be submitted for a complete application and will provide the opportunity to discuss:

- the nature of the application;
- development and planning issues;
- fees
- the need for information and/or reports to be submitted with the application;
- the planning approval process;
- other matters, as determined.

10. Additional Comments:

Niagara Region comments will be provided separately.

Planning Division

- Block 45 on the submitted plan will be subject to a future pre-consultation to address proposed concept and required application(s).
- Applicable Zone is to be achieved via CIHA or similar tool. If not, an OPA/ZBA may be required.
- Road network may be need to be adjusted to accommodate outcome of CIHA process. If so, a revised plan may be required.
- The proposed development may be eligible for the <u>Affordable Rental Housing Community Improvement Plan</u>, contact Nicolas Aiello, Nicolas.Aiello@welland.ca or (905) 735-1700 ext. 2132 for more information.

Engineering Division

- A storm water management report is required, demonstrating that the site will conform with the Northwest Welland Stormwater Management Implementation Plan (prepared by UCC, dated October 31, 2022)
- A Functional Servicing report is required, identifying maximum day water demands, required fire flow, and sanitary flows from the site, as well as the impact these will have on existing infrastructure. The FSR should demonstrate conformance with the latest Conceptual Servicing Design Report for the Northwest Welland Secondary Plan area
- The proposed road connections on this site must be approved through a TIS. An updated TIS for the overall NWSP area was recently submitted through the CIHA application. There are outstanding comments on this TIS, which need to be addressed for City approval.
- Full subdivision drawings including, Master Servicing, Master Grading, Plan and Profile, General Notes and Details, and Sediment and Erosion Control will be required for review and approval.

Building Division

- Planning Approvals required prior to Building Permit issuance. Applications cannot be made until Subdivision Agreement Registered and Section 28 Conditions are met. Normally a clause that includes servicing, roadways, street names etc. to be finalized with the Engineering Division. Addressing must be in place prior to acceptance of any BP apps as well.
- For Building Permit submission requirements, contact Building Division regarding Application Forms, design requirements and fees erwin.pasigan@welland.ca brian.mykytuik@welland.ca Building Services Technicians
- Geotechnical report/subsurface investigation completed by a Professional Engineer is required. Their recommendations for building design to be incorporated and referenced in the Structural drawings
- Development Charges are applicable and will be calculated during a Permit Application Review. If the owner wishes to estimate the fee at this stage of the development process, prior to building permit review process, please review the requirements in the respective Development Charges By-laws
- Cash-in-lieu of parkland dedication fees to be collected at the time of Building Permit issuance To be determined by current rates or appraisal obtained by the City of Welland. Contact
 Nicolas.Aiello@welland.ca, Policy Planning Supervisor (parkland dedication to be discussed)

Traffic Division

- Awaiting TIS resubmission for CIHA submission.

Parks Division

- Parks And Forestry is requesting that land be set aside for parkland as per the approved plan for this parcel.

Fire Division

- Request turn around dimensions, access, and hydrant locations on future site plan drawings.

Welland Hydro

- Developer to enter into a subdivider's agreement with Welland Hydro Electrical System Corp (WHESC).
- Electrical distribution design and drawings are to be completed by Developers' consultant and submitted to Welland Hydro Electric System Corp (WHESC) for review and approval.
- Developer to provide WHESC with a load calculation summary to assist with determining servicing requirements.
- The proposed development must meet the clearance requirements of section 3.1.19.1 "Clearance to Buildings" of the Ontario Building Code. See link below for further information. https://wellandhydro.com/wp-content/uploads/2022/06/WH_Clearances-to-Overhead-Electrical-Infrastructure.pdf
- The design shall include adequate clearance to facilitate the installation(s) of a padmounted transformer(s) as per CSA 22.3 No. 7-20 Section 10.
- Associated costs to provided WHESC's portion of servicing will be estimated, once review and approval the provided design package has been completed.
- Metering locations to be reviewed and approved by WHESC.
- Expansion of the existing hydro infrastructure located on Rice Rd will be required in order to facilitate servicing. Costs associated with this expansion are the responsibility of the Developer.
- Please completed WHESC's new subdivision service application via the link included below.
- https://wellandhydro.com/accounts-billing/subdivision-electrical-servicing-request-form/
- If easement(s) are required by WHESC to service this development or any future adjacent developments, the applicant shall provide at their expense all necessary registered easements.
- Contact WHESC's Engineering department if you have any further questions or concerns.

Mississaugas of the Credit First Nation

- MCFN Requests that a Stage 1 Archeological Assessment be undertaken and circulated to MCFN for review and comment. If a Stage 2 Archeological Assessment is warranted MCFN requests participation. Contact Abby LaForme, abby.laforme@mncfn.ca

Six Nations of the Grand River

- SNGR Requests a Stage 1 Archeological Assessment be undertaken and circulated to Six Nations. Contact Tany Hill, tanyahill-montour@sixnations.ca. If a Stage 2 Archeological Assessment is warranted Six Nations requests participation.

Notes:

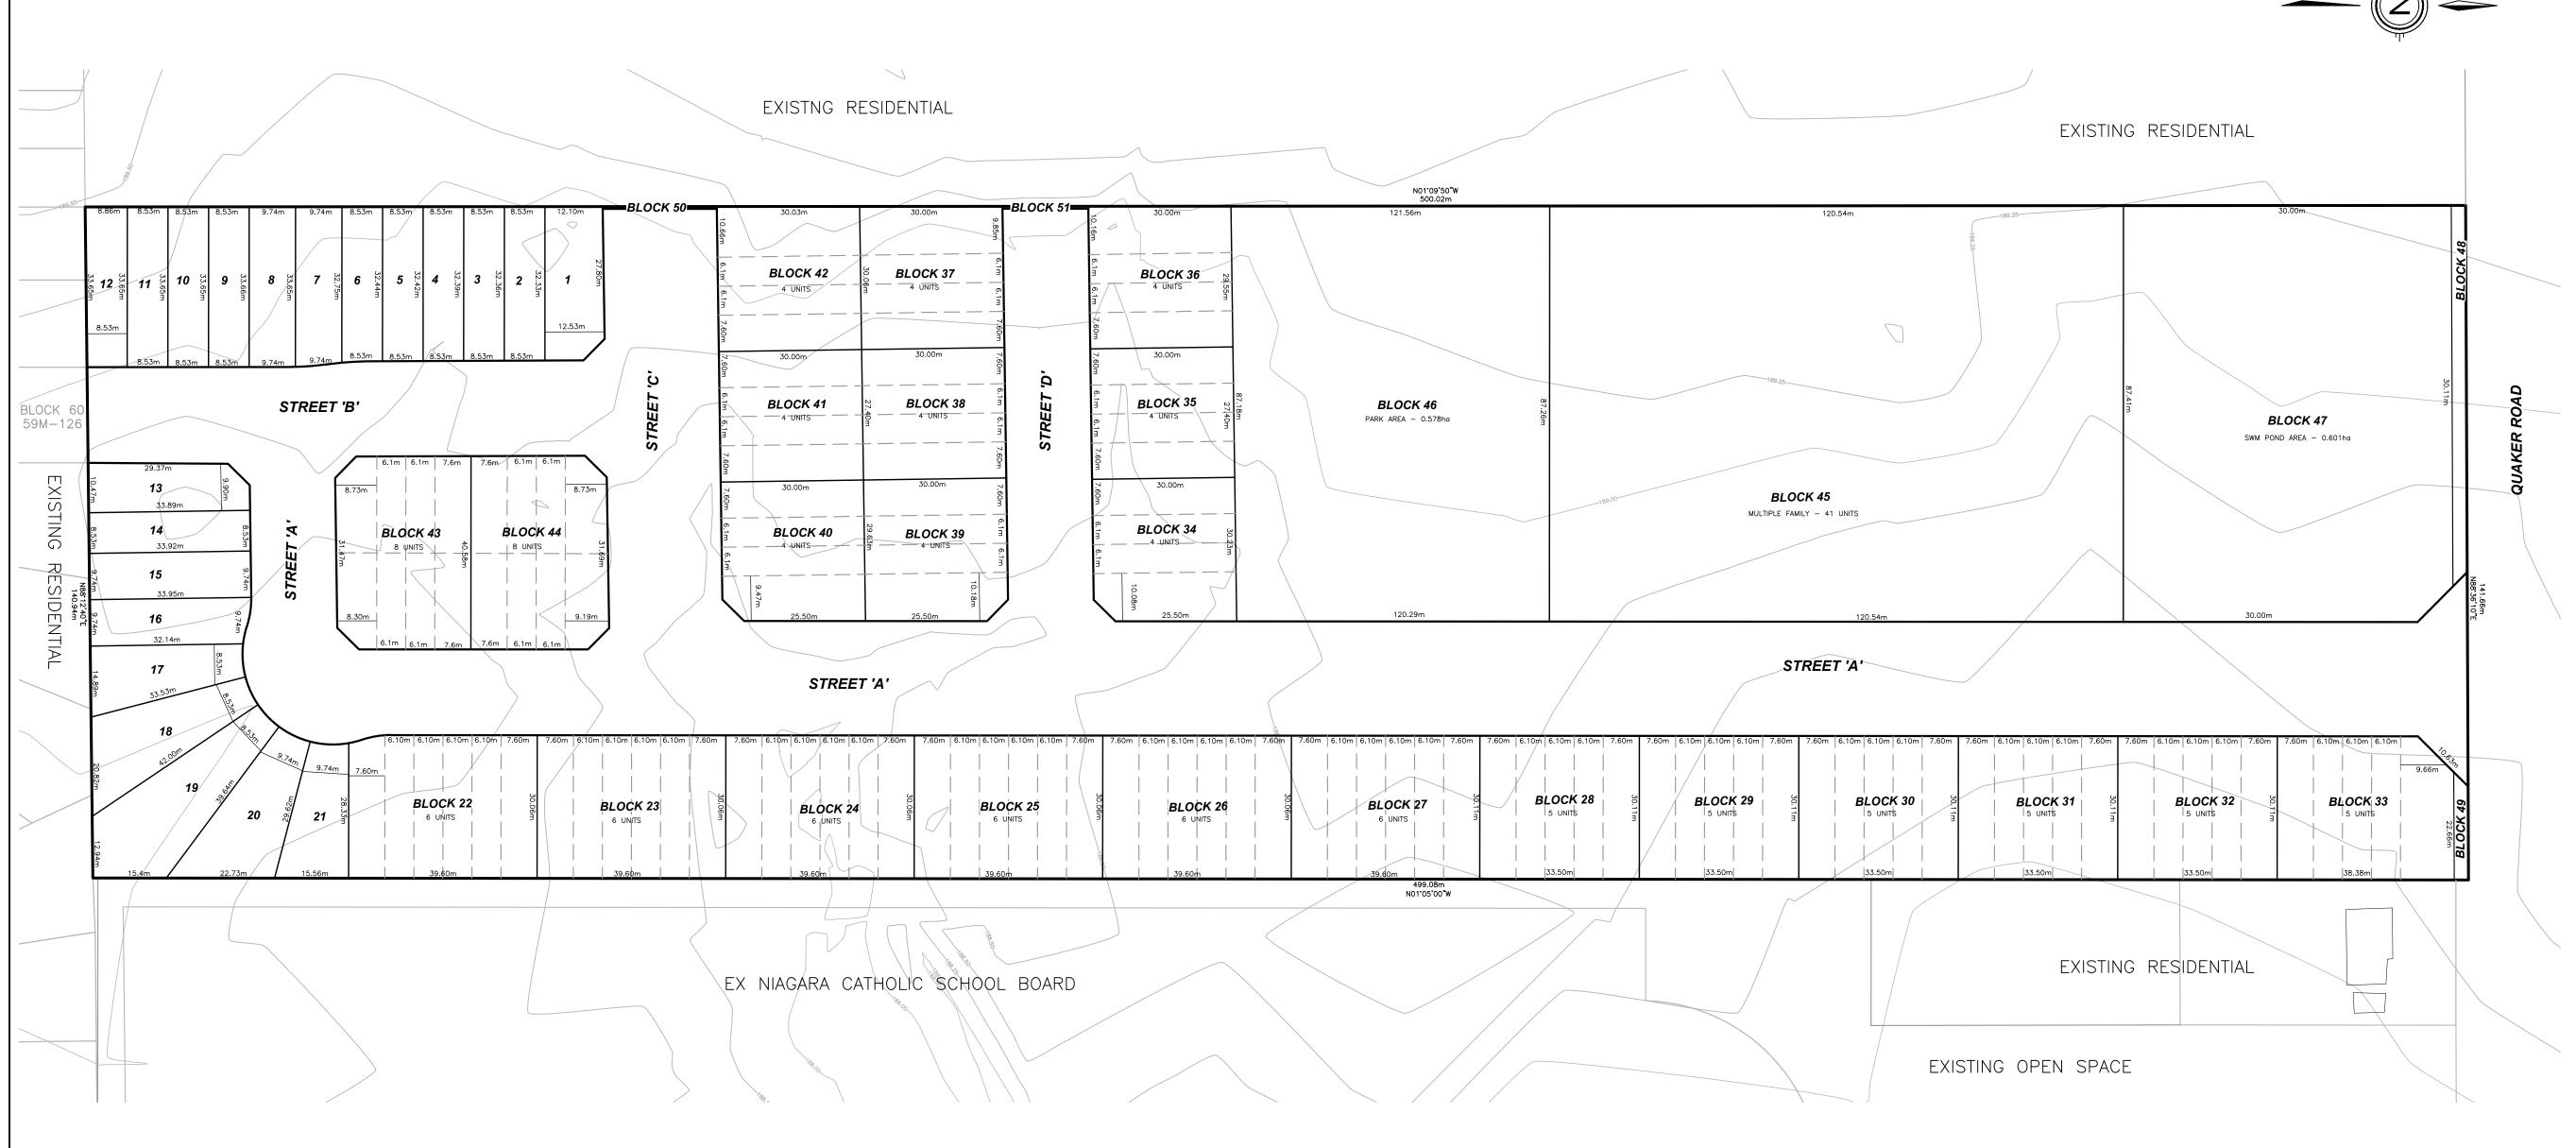

- 1. The purpose of this document is to identify the information required to commence processing and evaluating an application as set out in the Planning Act. This pre-consultation process is designed to proceed based on the mutual agreement of the parties as shown by the signatures below.
- 2. Pre-consultation does not imply or suggest any decision whatsoever on behalf of staff or the City to either support or refuse the application.
- 3. The applicant should be aware that the information provided is accurate as of the date of the preconsultation meeting. Should an application not be submitted in the near future, and should other policies, by-laws or procedures be approved by the Province, City, Region or other agencies prior to the submission of a formal application, the applicant will be subject to any new policies, by-laws or procedures that are in effect at the time of the submission of a formal application. If an application is not submitted within 1 year, it is advisable that the applicant confirm with the City the directives of the original preconsultation meeting.
- 4. Any application submitted without the information identified in this Pre-consultation Document will be deemed incomplete and not processed. Alternately, staff may recommend refusal of the application based upon insufficient information to properly evaluate the application.
- 5. The applicant acknowledges that the City and Region considers the application forms and all supporting materials including studies and drawings, filed with any application to be public information and to form part of the public record. With the filing of an application, the applicant consents and hereby confirms that the consent of the authors of all supporting reports have been obtained, to permit the City and Region to release the application and any supporting materials either for its own use in processing the application, or at the request of a third party, without further notification to, or permission from, the applicant.
- 6. It is hereby understood that during the review of the application additional studies or information may be required as a result of issues arising during the processing of the application or the review of the submitted studies.
- 7. If the City or Region does not have sufficient expertise to review and determine that a study is acceptable, the City may require a peer review. The cost of the peer review shall be paid for by the applicant. The Terms of Reference for a peer review is determined by the City or Region.
- 8. Some studies may require NPCA review and clearance/approval. In this instance, the NPCA review fee shall be paid by the applicant.
- 9. All plans and statistics must be submitted in metric.

AMENDMENT NO. X

to the

OFFICIAL PLAN

of the

CORPORATION OF THE CITY OF WELLAND

THE CORPORATION OF THE CITY OF WELLAND BY-LAW NUMBER 2024-XX

A BY-LAW TO AUTHORIZE THE ADOPTION OF OFFICIAL PLAN AMENDMENT NO. XX

WHEREAS the Official Plan of the Corporation of the City of Welland was adopted by the City of Welland on May 4, 2010.

AND WHEREAS the Regional Municipality of Niagara gave partial approval to the Official Plan on October 21, 2011.

AND WHEREAS the Ontario Municipal Board gave partial approval to the Official Plan on June 24, 2014.

AND WHEREAS the Council of the Corporation of the City of Welland deems it expedient to amend the Official Plan.

AND WHEREAS the Regional Municipality of Niagara is the approval authority for Amendments to the Official Plan of the Corporation of the City of Welland.

AND WHEREAS the Regional Municipality of Niagara has exempted Official Plan Amendment No. XX to the Official Plan of the Corporation of the City of Welland from approval in accordance with the Memorandum of Understanding between the Regional Municipality of Niagara and the Corporation of the City of Welland.

NOW THEREFORE THE MUNICIPAL COUNCIL OF THE CORPORATION OF THE CITY OF WELLAND ENACTS AS FOLLOWS:

- 1. That the Corporation of the City of Welland hereby adopts and approves Official Plan Amendment No. XX for the Corporation of the City of Welland.
- 2. That Staff is hereby authorized and directed to give Notice of Council's adoption of Amendment No. XX to the Official Plan of the Corporation of the City of Welland in accordance with Section 17(23) of the *Planning Act*.

PART A - THE PREAMBLE (This does not constitute part of the Amendment)

TITLE AND COMPONENTS

This document, when approved in accordance with the Planning Act, shall be known as Amendment No. XX to the Official Plan of the Corporation of the City of Welland.

Part "A", the Preamble, does not constitute part of this Amendment.

Part "B", the Amendment, consists of the map and text changes.

Part "C", the Appendices, which does not constitute part of this Amendment, contains the background data, planning considerations and public involvement associated with this Amendment.

PURPOSE OF THE AMENDMENT

The purpose of Official Plan Amendment No.XX is to redesignate the lands shown on the attached Schedule "A" to facilitate the development of a subdivision development, a park, and stormwater management facility.

LOCATION

The lands subject to this Amendment are located on the south side of Quaker Road, west of Rice Road, and are known municipally as 575 Quaker Road. The lands are legally described as Part of Township Lot 235, Geographic Township of Thorold, Now in the City of Welland, Regional Municipality of Niagara.

BASIS

The subject lands are within the Urban Area Boundary for the City of Welland and are currently designated Low-Density Greenfield Residential and Open Space and Recreation. A proposal has been put forth to designate the lands Low-Density Greenfield Residential – Special Policy Area and Medium Density Residential – Special Policy Area to permit an additional residential built form and increased density, and Open Space and Recreation for parkland and a stormwater management facility. The proposed residential development includes a minimum of one hundred and seventy-one (171) dwelling units.

PART B - THE AMENDMENT

All of the Amendment entitled PART B - THE AMENDMENT, consisting of the following Policies and the map referred to as Schedule "A" - Land Use Plan and Policies, constitutes Amendment No. XX to the Official Plan of the Corporation of the City of Welland.

Details of the Amendment

- 1. Section 4.2.2.2A is amended by deleting "maximum density of 24 dwelling units per net hectare of land" and replacing it with "maximum density of 60 dwelling units per net hectare" on lands shown "Low Density Greenfield Residential Special Policy Area" being Parts 1 and 2 on Schedule "A" attached hereto.
- 2. Section 4.2.2.2B is amended by adding "multiple dwellings" after "townhouse" in the first sentence for lands shown as "Low Density Greenfield Residential Special Policy Area" being Parts 1 and 2 on Schedule "A" attached hereto.
- 3. Section 4.2.2.3A is amended by letting "maximum density of 60 dwelling units per net hectare of land" and replacing it with a "maximum density of 125 dwelling units per net hectare of land" on lands shown as "Medium Density Residential Special Policy Area" being Parts 3 and 4 on Schedule "A" attached hereto.
- 4. Section 4.2.2.3B is amended by adding "multiple dwellings" and "mid-rise apartment buildings" in the first sentence for lands shown as "Medium Density Residential Special Policy Area" being Parts 3 and 4 on Schedule "A" attached hereto.
- 5. Section 4.2.2.3C is to be amended by adding "mid-rise development (4-8 storeys)" for lands shown as "Medium Density Residential Special Policy Area" being Parts 3 and 4 on Schedule "A" attached hereto.
- 6. Schedule G Northwest Welland Secondary Plan is hereby amended to redesignate lands shown on Schedule "A" attached hereto as follows:
 - a) Part 1 from "Low Density Greenfield Residential" to "Low Density Greenfield Residential – Special Policy Area";
 - b) Part 2 from "Open Space & Recreation" to "Low Density Greenfield Residential Special Policy Area":
 - c) Part 3 from "Open Space & Recreation" to "Medium Density Residential Special Policy Area";
 - d) Part 4 from "Low Density Greenfield Residential" to "Medium Density Residential Special Policy Area";

- e) Part 5 to remain "Open Space & Recreation"; and f) Part 6 from "Low Density Greenfield Residential" to "Open Space & Recreation".

SCHEDULE "A" LAND USE PLAN

PART C - THE APPENDICES

The following appendices do not constitute part of Amendment No. XX to the Official Plan of the Corporation of the City of Welland, but are included only as information supporting the amendment.

APPENDIX I - Affidavit

APPENDIX II - Notice of Adoption

APPENDIX III - Minutes of Public Meeting

APPENDIX IV - Staff Report

APPENDIX V - Council Resolution (Certified)

IN THE MATTER OF SECTION 7, ONTARIO REGULATION 543/06

AND

IN THE MATTER OF THE ADOPTION OF OFFICIAL PLAN AMENDMENT NO. XX BY BY-LAW 2024-XX PASSED BY COUNCIL OF THE CORPORATION OF THE CITY OF WELLAND ON XX XX, 2024.

- I, <u>Grant Munday</u> of the City of Welland in the Regional Municipality of Niagara, make oath and say as follows:
- 1. I am the <u>Director of Planning and Development Services</u> of the Corporation of the City of Welland.
- 2. That in accordance with Section 17(15) of the *Planning Act*, as amended and Section 3 of Ontario Regulation 543/06, Notice of the Public Meeting was published in the Welland Tribune on X. I hereby certify that the required Public Meeting was held on X by the Council of the Corporation of the City of Welland.
- 3. A list of all persons or public bodies which made oral submissions at the Public Meeting is attached as Schedule "A" to this Affidavit.
- 4. That in accordance with Section 17(23) of the *Planning Act*, as amended, and Ontario Regulation 543/06, the requirements for the giving of Notice of Adoption of the Amendment have been complied with.
- 5. That in accordance with Section 7(7) of Ontario Regulation 543/06, the decision of Council is consistent with the Policy Statements issued under sub-Section 3(1) of the Act and conforms to any applicable Plans.

Sw	orn be	fore me at th	e City of Wella	nd	
in	the	Regional	Municipality	of	
Nia	gara,	this X day	of XX, 2024.		

SCHEDULE "A" TO APPENDIX 1 - AFFIDAVIT

List of individuals who made oral submission in support of the application at the Statutory Public Meeting conducted X, 2024 concerning Amendment No. X to the Official Plan of the Corporation of the City of Welland

In Support

In Opposition

APPENDIX II - NOTICE OF ADOPTION

CITY OF WELLAND NOTICE OF ADOPTION OF AMENDMENT NO. X TO THE OFFICIAL PLAN OF THE CORPORATION OF THE CITY OF WELLAND

Take notice that the Council of the Corporation of the City of Welland passed By-law 2023-X, being a By-law to adopt Amendment No. X to the Official Plan on X, 2023 under Section 17(23) of The Planning Act, as amended.

The Purpose of Amendment No. X is to redesignate lands shown on Schedule A to Low Density Greenfield Residential – Special Policy, Medium Density Residential and Open Space & Recreation.

The Effect of the redesignation is to allow for the development of a subdivision plan, public park and future condominium residential development.

Pursuant to Section 17(23.1)(a) of the *Planning Act*, as amended, City Council took into consideration all written and oral presentations made to it before rendering a decision.

An appeal, to the Ontario Land Tribunal, in respect to the Amendment to the Official Plan is made by filing with the Clerk of the City of Welland, no later than X, 2024, a notice of appeal setting out the specific part of the proposed Amendment to the Official Plan to which the appeal applies, set out the reasons for the appeal and be accompanied by the fee prescribed under the Ontario Municipal Board Act in the amount of \$1000.00 payable by certified cheque to the Minister of Finance, Province of Ontario.

The proposed Amendment to the Official Plan is exempt from approval by the Regional Municipality of Niagara and the Decision of Council is final if a notice of appeal is not received on or before the last day for filing a notice of appeal.

Only individuals, Corporations or public bodies may appeal a Decision of the

municipality to the Ontario Municipal Board.

No person or public body shall be added as a party to the hearing of the appeal unless, before the Plan was adopted, the person or public body made oral submissions at a Public Meeting or written submissions to the Council or, in the opinion of the Ontario Municipal Board, there are reasonable grounds to add the person or public body as a party.

The land to which this proposed Amendment to the Official Plan applies is also the subject of an Application for Zoning By-law Amendment - File 2023-XX.

A copy of the Amendment and Staff Report are available for inspection by the public as of X, 2024 at Infrastructure and Development Services - Planning Division, 60 East Main Street, Welland during regular office hours.

Dated at the City of Welland this X day of X, 2024.
